SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For year ended December 31, 2022

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

SEAFARER EXPLORATION CORP.

(Exact name of registrant as specified in its charter)

Florida

90-0473054

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

14497 N. Dale Mabry Highway, Suite 209-N, Tampa, Florida 33618

(Address of principal executive offices) (Zip code)

(813) 448-3577

Registrant's telephone number

Securities registered pursuant to Section 12(g) of the Act:
Common Stock, par value \$0.0001 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated Filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting common equity held by non-affiliates of the registrant was approximately \$17,332,344 as of the last business day of the registrant's most recently completed second fiscal quarter, based upon the closing sale price on the OTC:BB reported for such date. Shares of common stock held by each officer and director, and by each person who owns 10% or more of the outstanding common stock, have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 31, 2023 the Registrant had 7,499,729,658 outstanding shares of its common stock, \$0.0001 par value.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS AND ASSOCIATED RISKS

Statements in this Form 10-K under “Item 1. Business”, “Item 2. Properties”, “Item 3. Legal Proceedings”, “Item 7. Management’s Discussions and Analysis of Financial Condition and Results of Operations” and elsewhere constitute “forward-looking statements”. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Seafarer Exploration Corp., a company organized under the laws of Florida, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following: our ability to continue as a going concern; general economic and business conditions; competition; success of operating initiatives; our ability to raise capital and the terms thereof; changes in business strategy or development plans; future revenues; the continuity, experience and quality of our management; changes in or failure to comply with government regulations or the lack of government authorization to continue our projects; and other factors referenced in the Form 10-K.

The use in this Form 10-K of such words as “believes”, “plans”, “anticipates”, “expects”, “intends” and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. The success of the Company is dependent on our efforts and many other factors including, primarily, our ability to raise additional capital.

We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Such forward-looking statements are based on the beliefs and estimates of our management, as well as on assumptions based on information currently available to us at the time such statements were made. Forward looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward looking statements, including, without limitation, the failure to successfully locate cargo and artifacts from historic shipwreck sites and a number of other risks and uncertainties. Actual results could differ materially from those projected in the forward-looking statements, either as a result of the matters set forth or incorporated in this Report or as a result of certain economic and business factors, some of which may be beyond our control.

We disclaim any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

As used in this Form 10-K, the terms “we,” “us,” “our,” “Seafarer,” and the “Company” mean Seafarer Exploration Corp. unless otherwise indicated.

PART I

Item 1. Business.

Summary

Seafarer Exploration Corp. (“the Company” or “Seafarer”), a Florida Corporation, was incorporated on May 28, 2003. The Company formerly operated under the name Organetix, Inc. (“Organetix”). The Company’s principal business plan is to develop the infrastructure to engage in archaeological research, archaeologically-sensitive exploration, recovery and conservation of historic shipwrecks and to eventually monetize the recovery of artifacts. The business plan includes in-depth archival research and translation of historical documents from archives and repositories from around the world. The plan also includes the development of various new technologies which will improve efficiencies of both time and accuracy, as well as create a smaller operational footprint.

The exploration and recovery of historic shipwrecks is by nature very speculative, and there is a high degree of risk inherent in this type of business venture. The exploration and recovery of historic shipwrecks involves a multi-year, multi-stage process and it may take very long periods of time, several years to decades, and/or be prohibitively expensive to locate and recover valuable artifacts, if any are ever located at all, from historic shipwreck sites. It is for those reasons that Seafarer and others feel it is mandatory to develop new advanced technologies.

The Company is also actively researching, exploring and testing new technology to help more accurately understand current and future historic shipwreck sites in an unobtrusive manner. Up to the date of this filing, all tests of new and unproven technology and methods have failed with the exception of the Company’s proprietary SeaSearcher device which is still in development. Additional scientists have been hired as consultants to assist in these endeavors. The ongoing cost of SeaSearcher development is substantial and is an additional and significant financial hurdle for the Company. Seafarer believes the advancement of this technology is important for the advancement of the field of archaeology.

The Company regularly reviews opportunities to perform exploration and recovery operations at purported historic shipwreck sites; however, the Company does not have specific plans to perform exploration and recovery operations at other shipwreck sites at the present time. The Company is actively reviewing other potential historic shipwreck sites for possible exploration and recovery. Should the Company decide that it will pursue exploration and recovery activities at other potential shipwreck sites it may be necessary to obtain permits as well as environmental permits. Some potential shipwreck sites are outside of State waters which will be very advantageous to Seafarer since state permitting agencies will not be able to continuously hamper or slow Seafarer’s operations, as demonstrated in the past.

There are a number of other significant challenges and risks regarding this type of business venture that make it risky with potential that the Company could fail. If the Company were to cease its operations, it is likely that there would be complete loss of all capital invested in and/or borrowed by the Company to date.

Limited Revenue and Significant Operating Losses

The Company expects to continue to incur significant operating losses and to generate negative cash flows from operating activities while developing the necessary infrastructure and technology for the exploration of historic shipwreck sites.

The Company’s ability to eliminate operating losses and to generate positive cash flow from operations in the future will depend upon a variety of factors, many of which it is unable to control. Based on our historical rate of expenditures, the Company expects to expend its available cash in three months or less from March 24, 2023. If the Company is unable to implement its business plan successfully, it may not be able to eliminate operating losses, generate positive cash flow, or achieve or sustain profitability, which would materially and adversely affect its business, operations, and financial results, as well as its ability to make payments on its debt obligations, and the Company may be forced to cease its operations. If the Company is not able to continue to raise capital, then it will be forced to cease its operations, which would likely result in both the complete loss of all capital invested in and loans provided to the Company.

The Company’s Auditor has Substantial Doubts as to the Company’s Ability to Continue as a Going Concern.

The Company has not generated any meaningful revenue since inception. Our future is dependent upon our ability to obtain financing to continue our exploration activities. We may seek additional funds through private placements of our common stock. For the past several years the Company’s auditors have issued an opinion that substantial doubt exists as to whether the Company can continue as a going concern, making it more challenging for the Company to obtain financing from investors. If the Company becomes unable to obtain financing, then it is very likely that the it will be forced to cease operations and all capital invested in or loaned to the Company will be lost. Our consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event we cannot continue in existence.

Companies such as Seafarer that do not generate significant cash flow to cover expenses must rely on outside financing, which carries a very high degree of risk due to the fact that it may become extremely challenging or impossible to obtain such outside financing. We cannot guarantee we will be successful in generating revenue in the future or be successful in raising funds through the sale of shares to pay for the Company's business plan and expenditures. During the years ended December 31, 2022 and 2021, we did not generate any significant revenues from continuing operations. Failure to generate revenue or to raise funds could cause us to go out of business, which would result in the complete loss of capital invested in the Company.

General

It has been estimated by the United Nations Educational, Scientific and Cultural Organization ("UNESCO") that there are over three million undiscovered shipwrecks around the world and some of these shipwrecks were lost with verifiable cargoes that contained valuable materials, including artifacts and treasure. However, many of these shipwrecks may have very little archaeological or historical value, and furthermore, a high percentage of these shipwrecks would not have been carrying valuable cargo including artifacts or treasure.

The Company's principal business plan is to develop the infrastructure and technology to engage in the archaeologically-sensitive exploration, recovery and conservation of historic shipwrecks and develop new technologies to vastly improve archaeology. Once artifacts have been properly conserved, they will be made available for scientific research and allowed to be displayed for the public.

The Company believes it may eventually be conducting archaeological research around the world and potentially supporting governmental or quasi-governmental organizations, universities and affiliated research groups and private research entities in the documentation and survey of historic shipwrecks based on their discretion. The business plan also includes in-depth archival research and translation of historical documents from various international archives and repositories. These translations of archival research will be made available to the country of origin, the State of Florida, university researchers, and other responsible academic parties upon reasonable request. The Company works with archaeologists to attempt to further ensure all sensitive archaeological guidelines are met or exceeded.

The Company has investigated various technologies and non-scientific equipment to help better explore or document historic shipwreck sites. To the present date, none of these technologies have been proven to have any efficacy with the exception of the SeaSearcher. The SeaSearcher has however experienced technical issues during the development phase that have caused operational delays that are expensive both in terms of repairs and down time. The Company, along with its development partner, is attempting to develop a hand held metal discriminator for precision location of ferrous and nonferrous metals based on the SeaSearcher technology, as well as other technologies to improve operating efficiencies. The Company will continue to experiment with unproven technologies and will actively work with third parties, consultants and scientists to develop its own proprietary technology which will result in extra expenses to the Company. These development expenses will continue indefinitely.

The exploration and recovery of historic shipwrecks involves a multi-year, multi-stage process. It may take many years and/or be prohibitively expensive to locate, if any are ever located at all, and recover valuable artifacts from historic shipwrecks. Locating and recovering valuable artifacts is very challenging, expensive, and rare which is why the Company is developing the SeaSearcher at significant expense. If the Company is not able to locate artifacts or treasure with significant value, then there is a high probability that the Company will face adverse consequences which would likely result in the loss of both all capital invested in or loaned to the Company.

There are a number of significant issues and challenges including, but not limited to, government regulation and/or the Company's inability to secure permits and contracts, lack of financing, lack of revenue and cash flow and continued losses from operations that make the exploration and recovery of historic shipwrecks a speculative business venture. There is also significant expense involved in research and ongoing educational programs. Research expenses may involve paying scientists for translations, and research dues and fees for various historical entities such as archives, travel and accommodations, and research materials, as well as developmental expenses for the SeaSearcher and the continued expense of teaching our divers archaeology.

Furthermore, underwater recovery operations are inherently difficult and dangerous and may be delayed or suspended by weather, sea conditions or other natural hazards. In addition, even though sea conditions in a particular search location may be somewhat predictable, the possibility exists that unexpected conditions may occur, and already have occurred, that adversely affect the Company's operations. It is also possible that natural hazards may prevent or significantly delay search and recovery operations.

In addition to natural hazards there may be constant repair and maintenance issues with historic shipwreck exploration and recovery vessels. The Company's past primary exploration vessel was an older vessel that was originally used in other capacities and has been converted for use in historic shipwreck exploration and recovery operations. The repairs, maintenance and upkeep of vessels, is time consuming and can be very expensive and there may be significant periods of vessel down time that results from needed repairs being made or a lack of current financing to make repairs to the vessel.

Even if the Company is able to obtain permits for historic shipwreck projects, there is a possibility that the shipwrecks may have already been salvaged, may not be located, or may not have had anything valuable on board at the time that they sank. The potential advantage of the newly developed technology is designed to potentially eliminate or reduce these risks. It is the Company's intent to find shipwrecks where available research suggests there were not any previous recovery efforts or past recovery efforts failed or were not completed. In the event that valuable artifacts are located and recovered, it is possible that the cost of recovery will exceed the value of the artifacts recovered. It is also possible that other entities, including both private parties and governmental entities, will assert conflicting claims and challenge the Company's rights to the recovered artifacts.

Moreover, there is the possibility that should the Company be successful in locating and recovering artifacts that have significant archeological and/or monetary value, that a country whose ship was salvaged may attempt to claim ownership of the artifacts by pursuing litigation. In the event that the Company is able to make a valid claim to artifacts or other items at a shipwreck site, there is a risk of theft of such items at sea, both before or after the recovery or while the artifacts are in transit to a safe destination, as well as when stored in a secured location. Such thefts may not be adequately covered by insurance. Based on a number of these and other potential issues the Company could spend a great deal of time and invest a large sum in a specific shipwreck project and receive very little or no salvage claim or revenue for its work. The Company does have plans for security at sea, however it may never implement such plans.

There is currently a limited trading market for our securities. We cannot assure when and if an active-trading market in our shares will be established, or whether any such market will be sustained or sufficiently liquid to enable holders of shares of our common stock to liquidate their investment in our company. The ability to deposit restricted shares has also become increasingly more difficult over the past several years. Some clearing firms who used to clear low priced securities for multiple brokerage firms have closed or been acquired, resulting in fewer brokerage firms that are willing or able to accept lower priced securities for deposit. Unless an investor has a large and well-established relationship with a brokerage firm, it may be very challenging and potentially expensive to deposit lower priced securities. An investor should consider consulting with professional financial advisers before making an investment in our securities. Furthermore, the sale of unregistered and restricted securities by current shareholders, including shares issued to consultants and shares issued to settle convertible promissory notes and to settle debt, may cause a significant drop in the market prices of the Company's securities. Also, because the Company primarily finances the operations with the sale of securities, an increase to the authorized shares may need to be done from time to time.

Accordingly, an investment in Seafarer's securities is speculative and extremely risky and should only be considered by those investors who do not require liquidity and who can afford to suffer a total loss of their investment. An investor should consult with professional advisers before making an investment in our securities.

Competition

There are a number of competing entities who are engaged in various aspects of the exploration and salvage of historic shipwrecks, and in the future other competitors may emerge. Some of these companies are publicly traded companies and there are a number of small private companies, as well as some loosely affiliated groups and individuals, who claim to be in this business as well. Some of these entities may be better capitalized and may have greater resources to devote to the pursuit of locating and salvaging historic shipwrecks. Very few of these competing entities may also have significantly more experience than the Company in the exploration and recovery of historic shipwrecks. The Company could be at a material competitive disadvantage as compared to competing entities that are better capitalized, have more resources and/or who possess greater experience in the business. The Company will, and has, actively considered working with other entities in this industry sector.

Lack of Revenues and Cash Flow/Significant Losses from Operations

The exploration and recovery of historic shipwrecks requires a multi-year, multi-stage process and it may be many years before any revenue is generated from exploration and recovery activities, if ever. Without significant revenues and cash flow the Company does not have reliable cash flow to pay its expenses. The Company relies on outside financing in the form of equity and debt and it is possible that the Company may not be able to obtain outside financing in the future. If the Company is not able to obtain financing, then it would more than likely be forced to cease operations and all capital invested in the Company or borrowed by the Company will be lost. If the Company is unable to secure additional financing or meaningful revenues, our business may fail and our stock price may be adversely affected which could result in a total loss of investment capital. The raising of additional financing will, as it has over the last several years, result in dilution of the Company's current shareholders or a significant decrease in the value of the Company's securities.

In addition, the expenses associated with operating a small publicly traded company engaged in the historic shipwreck recovery business are exorbitantly high. The cost of operations may include the cost of buying or leasing vessels, regular vessel maintenance and upkeep, ongoing vessel repairs due to wear and tear and damage by natural or human causes, docking fees, fuel, upgrades, equipment costs, personnel costs, insurance, registration costs, permitting, temporary lodging and provisions for divers and other personnel. In addition to the operating expenses, a publicly traded company also incurs the significant recurring costs of maintaining publicly traded status, which include, but are not limited to administrative, accounting, audit, executive, legal, including legal expenses required in responding to comments from permitting agencies, shutdowns, and administrative appeals.

The additional delays to the Company's operational goals and objectives as a result of being prohibited by a state permitting agency from utilizing ground disturbing work for periods of time have been harmful as the Company must still cover overhead and fixed expenses while some activities are temporary on hiatus. These combined expenses are particularly burdensome for a smaller public company. The recurring expenses associated with being a publicly traded company focused on the exploration and recovery of historic shipwrecks may cause the Company to be at a significant competitive disadvantage when compared to some of its competitors who are private companies or other public companies.

Due to these and other factors, the Company may not be able to continue as a going concern. If the Company is not able to continue as a going concern, it is highly likely that all capital invested in the Company or borrowed by the Company will be lost. As discussed in Note 2 – Going Concern to our consolidated financial statements for the years ended December 31, 2022 and 2021, we have experienced operating losses in every year since our inception resulting in an accumulated deficit. Based on our financial results as of December 31, 2022, there are substantial doubts about the Company's ability to continue as a going concern. If the Company is not able to continue as a going concern, it is likely that all capital invested in the Company or borrowed by the Company will be lost.

The Company has experienced a net loss in every fiscal year since inception. The Company's net losses were \$2,616,601 for the year ended December 31, 2022 and \$2,625,414 for the year ended December 31, 2021. The Company believes that it will continue to generate losses from its operations for the foreseeable future and the Company may not be able to generate a profit in the long-term, or ever.

Governmental Regulation

There are very strict international, federal and state laws that govern the exploration and recovery of historic shipwrecks. While the Company has been able to obtain some permits, there is no guarantee that the Company will be able to secure future permits or enter into agreements with government agencies in order to explore and salvage historic shipwrecks. Seafarer believes they are the only company to be issued a full recovery permit by FBAR since 1986, other than one entity with an Admiralty Claim. This demonstrates the difficulty of obtaining a recovery permit from FBAR. There is a risk that government entities may enact legislation that is so strict that any recovery of artifacts and cargo from historic shipwrecks will be nearly impossible. Additionally, permits and agreements with governmental agencies to conduct historic shipwreck exploration and recovery operations are expensive, in terms of both direct costs and ongoing compliance costs. It is also possible that the Company will not be successful in obtaining title or permission to excavate certain wrecks, even if the law allows it. It is possible that permits that are sought for potential future international projects may never be issued, and if issued, may not be legal or honored by the entities that issued them. For the above reasons, the Company has extended its research into shipwrecks outside of State waters.

The laws and regulations regarding the exploration and recovery of historic shipwrecks in waters controlled by the State of Florida are complex. A large amount of time and expense is required to comply with the existing laws and regulations. For example, the State of Florida has, in the past, proposed new rules and regulations regarding the exploration and recovery of shipwrecks in Florida waters. The Company believes any new rules and regulations that are implemented into law would likely increase the cost of compliance and potentially force the Company to cease its operations. It is possible that the State of Florida may enact additional laws that ultimately make it impossible to conduct business as a commercial shipwreck exploration and recovery firm. It may also be possible that the State of Florida attempts to enact legislation which altogether bans the commercial exploration and recovery of historic shipwrecks in State controlled waters.

There is a possibility that new governmental regulations could be enacted at any time at the international, federal or state level that would make it impossible for the Company to continue to attempt to locate and salvage historic shipwrecks. Governmental regulation at all levels may substantially increase the costs and expenses incurred by the Company to obtain permits and agreements and comply with the regulations and represent a significant risk to the Company and all companies engaged in the commercial exploration and recovery of historical shipwrecks. This again reflects the need of the Company to continue exploration outside of State waters.

Furthermore, governmental agencies may require various types of permits to explore shipwreck sites, and the permitting process is often lengthy and complex. Obtaining permits and entering into agreements with governmental and quasi-governmental agencies to conduct historic shipwreck exploration and recovery operations is generally a very complicated, time consuming, and expensive process. Moreover, the process of entering into agreements and/or obtaining permits may be subject to lengthy delays, and in some cases in excess of a year. Some governmental agencies may refuse to issue permits to the Company for recovery of artifacts or intentionally delay the permitting process utilizing administrative requirements as a tactic to hamper and delay the process.

The reasons for a lengthy permitting process and delays of existing permits may be due to a number of potential factors including but not limited to requests by permitting agencies for additional information, forcing the Company to perform tasks that are not required by law or regulation, addressing only one subject matter at a time instead of parallel actions and delaying the permitting process, submitted applications that need to be revised or updated, newly discovered information that needs to be added to an application or agreement, requests for core sampling, requests for carbon dating, changes to either the agreement or permit terms or revisions to other information contained in the permit, excessive administrative time lags at permitting agencies, overly aggressive interpretation of statutes by permitting authorities to attempt to hamper private entities engaged in the exploration and recovery of historic shipwrecks and related archaeological materials, etc. The length of time it takes to obtain permits or enter into agreements, and the administrative time lag by permitting agencies with regards to permitting issues may result in the Company having to expend significant resources while waiting to perform exploration and recovery work with little or no visibility as to the timing of resolving such permitting issues.

There are also strict environmental regulations associated with the exploration and recovery of historical shipwrecks. In order to explore and recover shipwreck materials that are located in state regulated waters, the Company must obtain permission from both federal and state environmental agencies in order to conduct operations. There is always the possibility that the Company could be denied access to a historic shipwreck site based on federal or state environmental concerns.

Business Continuity Plan

Due to current events involving the global COVID-19 pandemic, Seafarer Exploration Corp. established a Business Continuity Group ("BCG") consisting of members of our Board of Directors, our CEO, and key advisors to monitor current events as they relate to our business and to be prepared to respond to any potential threats or issues in order to protect the Company. Seafarer's BCG periodically reviews developments concerning how the Company would respond to events that significantly disrupt the economy and its business.

As a part of its business continuity plan, Seafarer maintains a back office for some of its corporate records and information at the residence of our CEO. Our CEO has agreed to allow his residence to be used as temporary office space, if the need arises, at no charge to the Company.

Litigation

The Company has been engaged in various litigations in the past (please see Item 3. Legal Proceedings below). In the future the Company could be subject to litigations, although none are known or expected at this time. Potential future litigations could materially affect our ability to operate our business, which would negatively impact our results of operations and financial condition.

Historic Shipwreck Exploration and Recovery in Florida

The Company operates year-round, with some years having better diving in the winter and some years in the summer. Good weather conditions may allow operations to extend into the fall and winter months at certain historic shipwreck sites. Inclement weather and hazardous ocean conditions may hamper year round historical shipwreck exploration and recovery efforts when the Company is operating in waters off of the coast of Florida and significantly limit the amount of days that the Company is able to conduct operations.

Other factors that may hinder the Company's ability to conduct year round operations include a lack of financing, the expiration of permits and agreements or the need to renew or enter into permits and agreements with various governmental or quasi-governmental agencies, and delays by state permitting agencies stopping ground disturbances for debatable reasons.

Juno Beach

The Company has previously performed some exploration and recovery operations at what it believes to be a shipwreck site located off of the coast of Florida in northern Palm Beach County, more specifically in an area known as "Juno Beach" (the "Juno Beach Shipwreck"). The Company had previously obtained a recovery permit from the State of Florida for the Juno Beach site. The recovery permit expired in April of 2014. In March of 2015, Seafarer was awarded full rights to the Juno site pursuant to a court order, erasing all rights of the Company's previous partner with regards to the site. The Juno site was arrested permanently to Seafarer by the U.S. Marshal's offices in July of 2017 and in November 2017 the Company was granted final judgment on its federal admiralty claim for the Juno Beach shipwreck site (See Item 3 below).

From November 2017 until July 2021, the FBAR had requested that Seafarer submit new recovery permit applications on three separate occasions. Two of the recovery applications were denied for reasons Seafarer found objectionable. After submitting the third recovery application, the FBAR correctly determined that they did not have the authority to issue the recovery permit all along because the site was awarded exclusively to Seafarer by way of an Admiralty Claim. The Admiralty Claim was originally provided to FBAR in November 2017. However, FBAR delayed Seafarer's operations from continuing in Juno Beach until July 2021, a period of approximately three years and eight months.

The Company believes it is possible the Juno Beach Shipwreck site may potentially contain remnants of a sunken 1500s era ship; however, the Company does not have definitive evidence of the ship's country of origin. Due to the fact that the Company does not currently have sufficient data to positively identify the potential Juno Beach shipwreck, or its country of origin, it is not possible to determine with any degree of certainty whether or not the ship was originally carrying cargo of any significant value.

With data from the Master Site Plan from entries by a Florida state archaeologist from 1988 who has since retired, which the Company believes may have been withheld from it for several years, Seafarer believes that it is possible that a 1500s era shipwreck may be located within the Company's Admiralty Claim at Juno Beach, although it is very possible that if the shipwreck is located it does not contain anything of value. The Company has determined that a large portion of the magnetometer survey of the Juno Beach Shipwreck site that was originally provided to the Company by a past partner on the site was intentionally deleted. Shipwreck material and remnants including pottery, cannon balls, musket balls, ballast stones, nails, spikes, wood and scattered pieces of a sunken ship have all been found in the deleted area of a magnetometer survey.

The Company will attempt to complete a SeaSearcher survey of the entire deleted area when certain conditions are met. There is also a possibility that there are no artifacts of significant value located at the Juno Beach shipwreck site. Even if there are valuable artifacts and/or treasure located at the site, recovering them may be difficult due to a variety of challenges that include, but are not limited to; inclement weather, hazardous ocean conditions, sand and significant overburden that cover large areas of the site, strong multiple layer currents, etc.

Melbourne Beach

There is a purported historic shipwreck site located in the waters off of Melbourne Beach, Florida that the Company has been investigating. In February 2013, the Company signed an agreement with a third party who previously explored this site for the right to investigate the site. In March of 2014, Seafarer entered into a partnership and ownership with Marine Archaeology Partners, LLC ("MAP"), with the formation of Seafarer's Quest, LLC ("SQ"). SQ was formed in the State of Florida for the purpose of permitting, exploration and recovery of artifacts from a designated area on the east coast of Florida. Such site area is from a defined, contracted area by a separate entity, which a portion of such site is designated from a previous contracted holding through the State of Florida. Under such agreement, Seafarer is responsible for costs of permitting, exploration and recovery, and is entitled to 60% of such artifact recovery. Seafarer has 50% ownership and is the designated management of SQ. In November of 2019, the Company and MAP agreed to modify the partnership agreement so that the Company receives 80% and MAP receives 20% of any artifacts that are recovered after the state of Florida receives its anticipated 20% under any potential future recovery permits, which none such recovery permits have been applied for or issued as of the date of this filing.

In July of 2014, SQ received a 1A-31 Exploration Permit with a Dig and Identify modification, which gives us written authority to excavate and identify artifacts (the "Permit") from the Florida Division of Historical Resources for an area identified as Area 2 off of Melbourne Beach, Florida. The Permit was active for three years from the date of issuance. Seafarer on behalf of SQ, has been primarily focusing its operations on this site when the weather permits. The Company has utilized additional owned and rented vessels in order to perform search and identify operations at this site. Inclement weather and difficult sea conditions have hampered the Company's ability to perform exploration operations at this site to date, including the previously discussed delays involving FBAR. An archeologist with the technical skills, knowledge, and experience from around the world was hired to help ensure the integrity of the work. The Company has applied for permits from the State of Florida for two additional areas that were formerly permitted solely by an affiliate of MAP. The Permit for one of the additional areas was given to the Company on July 6, 2016 and identified as Area 1. The permits for Areas 1 and 2 were renewed in 2019 for an additional three years. It will be necessary to be granted a recovery permit in order to recover any artifacts and treasure that are located on the site. On October 7, 2020, the Company received a new permit from the Florida Department of Environmental Protection (the "FDEP") for Areas 1 and 2 at the behest of the FBAR. The FDEP permit is valid for 5 years. A permit transfer was completed, transferring a U.S. Army Corps of Engineers permit for Areas 1 and 2 from MAP to SQ. This transfer was done at the behest of the FBAR and the permit is valid until 2025.

Per Florida Statutes, Seafarer made a timely request for renewal of the 2019 permit for Areas 1 and 2 on July 29, 2021. In January of 2022, Seafarer received notification from the Florida Division of Historical Resources ("FDHR") that its permits for Areas 1 and 2, which was set to expire on January 19, 2022, has been continued indefinitely while the renewal request was being processed. It has been 19 months and the FDHR has not completed the renewal permits for Areas 1 and 2. The existing permits will continue until the renewals are finalized or rejected.

Per Florida Statutes, Seafarer made a timely request for renewal of the 2019 permit for Areas 1 and 2 on July 29, 2021. In January of 2022, Seafarer received notification from the Florida Division of Historical Resources ("FDHR") that its permits for Areas 1 and 2, which was set to expire on January 19, 2022, has been continued indefinitely while the renewal request was being processed.

It has been 19 months and the FDHR has not completed the renewal permits for Areas 1 and 2. The existing permits will continue until the renewals are finalized or rejected.

Certain Agreements

Agreement to Explore a Shipwreck Site Located off of Melbourne Beach, Florida

In March of 2014, Seafarer entered into a partnership and ownership with MAP with the formation of SQ. SQ was formed in the State of Florida for the purpose of permitting, exploration and recovery of artifacts from a designated area on the east coast of Florida. Such site area is from a defined, contracted area by a separate entity, which a portion of such site is designated from a previous contracted holding through the State of Florida. Under such agreement, Seafarer is responsible for costs of permitting, exploration and recovery, and is entitled to 80% of such artifact recovery after the state of Florida has taken their 20% under any future recovery permits. Seafarer has a 50% ownership, with designated management of the SQ coming from Seafarer. As of December 31, 2022, the partnership has had no operations. Seafarer is responsible for managing the site on behalf of SQ.

Florida Division of Historical Resources Agreements/Permits

The Company currently has two separately permitted Melbourne Beach area sites, called Area 1 and Area 2, that it is exploring. The Area 1 permit was renewed on March 1, 2019 for a period of three years. The Area 2 permit was renewed on January 14, 2019 for a period of three years. The Company submitted a permit renewal application for Area 2 on July 29, 2021 that the State of Florida has yet to act upon. The State of Florida has granted the Area 1 and Area 2 permit an extension until the State of Florida acts upon the submitted renewal application.

Item 1A. Risk Factors.

Not required for smaller reporting companies.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Corporate Office

The Company leases 823 square feet of office space located at 14497 North Dale Mabry Highway, Suite 209-N, Tampa, Florida 33618. The Company entered into an amended lease agreement commencing on July 1, 2020 through July 31, 2023 with base month rents of \$1,475 from July 1, 2020 to June 30, 2021, \$1,519 from July 1, 2021 to June 30, 2022, \$1,564 from July 1, 2022 to June 30, 2023 and \$1,611 from July 1, 2023 to July 31, 2023. Under the terms of the lease there may be additional fees charged above the base monthly rental fee.

Operations/Dive House

The Company also has an operating lease for a house located in Palm Bay, Florida that it leases on a month-to-month basis for \$1,350 per month. The Company uses the house to store equipment and gear and to provide work-related living quarters for its divers, personnel, consultants and independent contractors involved in its exploration and recovery operations. The Company also leases a house in Palm Bay for \$525 per month to store equipment.

Item 3. Legal Proceedings.

On September 3, 2014, the Company filed a lawsuit against Darrel Volentine, of California. Mr. Volentine was sued in two counts of libel per se under Florida law, as well as a count for injunction against the Defendant to exclude and prohibit internet postings. Such lawsuit was filed in the Circuit Court in Hillsborough County, Florida. Such suit is based upon internet postings on www.investorshub.com. On or about October 15, 2015, the Company and Volentine entered into a stipulation whereby Volentine admitted to his tortious conduct, however the stipulated damages agreed to were rejected by the Court, and the Company is proceeding to trial on damages against Volentine in a non-jury trial on December 1, 2015. The Defendant is the subject of a contempt of court motion which was heard on April 7, 2016, whereby the Court found a violation and modified the injunction against the Defendant, and imposed other matters of potential penalties against the Defendant. The Court also awarded attorney's fees against the Defendant on behalf of Seafarer for such motion. The Defendant subsequently attempted to have such ruling, evidence and testimony attacked through a motion heard before the Court on October 24, 2016. The Court dismissed the Defendant's motion after presentation of the Defendant's case at the hearing. The Plaintiff has set the matter for entry of the attorney's fees amount due from the Defendant for hearing in December 2016. As well the Plaintiff has set for hearing its motion for sanctions in the form of attorney's fees for frivolous filing of the October 24th motion, which motion is also set for hearing in December 2016. The Plaintiff filed a renewed and amended motion for punitive damages in the case on September 11, 2016, which has not been set for hearing. The Defendant had also filed a motion for summary judgment on the matter of notice entitlement pre-suit, which motion is pending before the Court. The Plaintiff filed a motion for sanctions against the Defendant for the motion for summary judgment being frivolous under existing law, and such motion is pending ruling on the motion. On December 7, 2016, the Court held a hearing on the Defendant's motion for sanctions, and essentially attempting to rehear the motion for contempt against the Defendant. The Court dismissed the Defendant's motions, and renewed the ability of the Company to seek attorney's fees on such matter, which hearing has not been set at present. On February 28, 2017, the Court entered an Order denying the Defendant's motion for summary judgment. The Company has filed a motion for punitive damages in March 2021 to be added to the cause of action and to be heard by the Court. The counsel for Volentine filed a motion to withdraw which was granted on March 7, 2021, and Volentine was given 60 days to obtain new counsel or proceed without such. The Company is seeking to get such matter to trial as soon as possible. Volentine, as of the date of this publication, has not obtained new counsel.

On April 17, 2020, the Company filed a lawsuit in the Circuit Court in and for Hillsborough County, Florida against Michael Torres ("Torres"), regarding fraud, fraud in the inducement, breach of contract and civil theft under Florida law, as well as for injunctive relief to cancel shares issued. Such shares are currently locked up with the transfer agent pending ruling of the Court. The civil theft claim seeks triple the damages for monies paid to Torres, plus attorney's fees and costs. Torres filed a motion to dismiss which was denied by the Circuit Court on July 28, 2020. Torres filed a general denial in an answer. Seafarer was in the discovery phase of the case when both sides agreed to a mediation of the matter. Mediation of the case occurred in January 2021, and the parties reached a confidential settlement agreement which is formally being entered, which includes cancellation of all shares issued to Torres. The case will officially be closed with entry of the final judgment accepting the settlement.

On January 18, 2022, Seafarer received notification from the Circuit Court of the Thirteenth Judicial Circuit that 61,183,646 restricted common shares from the Defendant could be returned to the Plaintiff. On January 19, 2022, such shares were returned to the treasury stock of Seafarer and accounted for by Seafarer's transfer agent. The settlement also included "Defendant (Torres) has agreed and hereby it is recognized by the Court that Defendant has made a full retraction of his assertions..." and agreed to pay back an undisclosed amount of money to Seafarer that the Company does not anticipate being able to collect.

On December 21, 2022, the Company filed a lawsuit in the Circuit Court in and for Hillsborough County, Florida against John Grimm ("Grimm"), for one count of Conversion. Personal Service on Grimm was completed on January 11, 2023. On February 8, 2023, the Company amended its Complaint to include Zachary Smith as co-plaintiff (the Company and Smith are collectively the "Plaintiffs") against Grimm for one count of Conversion, one count of Rescission, one count of Civil Theft, one count of Breach of Fiduciary Duty, and one count of Judicial Dissolution. The Plaintiff's jointly seek treble damages, attorney's fees, equitable relief, and the judicial dissolution of Delta Tango Foxtrot Customs, LLC. As of March 1, 2023, Grimm has evaded exhaustive Personal Service attempts by both private process servers and the Brevard County Sheriff's Department. If attempts of Personal Service remain unsuccessful, the Plaintiffs shall file a Motion on March 6, 2023, requesting the court approve Personal Service on Grimm via email, text message and Facebook messenger.

Item 4. Mine Safety Disclosures.

None.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information

Our common stock is presently quoted on the Pink Sheets under the symbol “SFRX”, as reflected below, though the current trading volume is small. No assurance can be given that any market for our common stock will continue in the future or be maintained. If an “established trading market” ever develops in the future, the sale of “restricted securities” (common stock) pursuant to Rule 144 of the Securities and Exchange Commission by members of management, consultants, promissory note holders or others may have a substantial adverse impact on any such market and the sale of restricted securities by management or others may significantly depress the market price of the Company’s shares.

We cannot assure when and if an active-trading market in our shares will be established, or whether any such market will be sustained or sufficiently liquid to enable holders of shares of our common stock to liquidate their investment in our company. If an active public market should develop in the future, the sale of restricted securities that have had the restrictive legend removed by current shareholders may be highly dilutive and could potentially have a substantial negative impact on any such market.

The Company’s share price is quoted on the Pink Sheets. Accordingly, an investment in our securities should only be considered by those investors who do not require liquidity and can afford to suffer a complete loss of their investment. An investor should strongly consider consulting with professional advisers before making such an investment.

Furthermore, the price of our common stock may be subject to a very high degree of volatility, which makes owning shares of our common stock highly risky. Our stock price fluctuated between \$0.0055 and \$0.0019 for the year ended December 31, 2022, and \$0.0079 and \$0.0023 for the year ended December 31, 2021. The price of our shares may fluctuate significantly despite the absence of any apparent reason. In addition, our stock is thinly traded, leading to even greater volatility. You should expect this volatility to continue into the foreseeable future.

The range of high and low intraday prices for our common stock during each quarter for 2022 and 2021 is shown below. The over-the-counter quotations reflect inter-dealer prices, with retail mark-up, mark-down or commission and may not necessarily represent actual transactions. Such prices were determined from information derived from www.nasdaq.com and do not necessarily reflect transactions, retail markups, markdowns or commissions.

Quarter Ended	High Price	Low Price
March 31, 2021	0.00079	0.0046
June 30, 2021	0.0070	0.0029
September 30, 2021	0.0067	0.0032
December 31, 2021	0.0050	0.0023
March 31, 2022	0.0055	0.0028
June 30, 2022	0.0047	0.0019
September 30, 2022	0.0040	0.0019
December 31, 2022	0.0040	0.0020

Penny Stock

Our stock is considered to be a penny stock. Our stock is subject to certain provisions of the Securities Exchange Act of 1934 (the “Exchange Act”), commonly referred to as the “penny stock” rules as defined in Rule 3a51-1. A penny stock is generally defined to be any equity security that has a market price less than \$5.00 per share, subject to certain exceptions. Since our stock is deemed to be a penny stock, trading is subject to additional sales practice requirements of broker-dealers.

Consequently, penny stock rules may restrict the ability or willingness of broker-dealers to trade and/or maintain a market in our common stock. Also, prospective investors may not want to get involved with the additional administrative requirements, which may have a material adverse effect on the trading of our shares. In recent years the ability to deposit restricted shares at broker-dealers has become increasingly difficult with burdensome administrative requirements.

The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a market price of less than \$5.00, other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock, to deliver a standardized risk disclosure document prepared by the SEC, that: (a) contains a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading; (b) contains a description of the broker’s or dealer’s duties to the customer and of the rights and remedies available to the customer with respect to a violation of such duties or other requirements of the securities laws; (c) contains a brief, clear, narrative description of a dealer market, including bid and ask prices for penny stocks and the significance of the spread between the bid and ask price; (d) contains a toll-free telephone number for inquiries on disciplinary actions; (e) defines significant terms in the disclosure document or in the conduct of trading in penny stocks; and (f) contains such other information and is in such form, including language, type size and format, as the SEC shall require by rule or regulation.

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, the customer with: (a) bid and offer quotations for the penny stock; (b) the compensation of the broker-dealer and its salesperson in the transaction; (c) the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and (d) a monthly account statement showing the market value of each penny stock held in the customer's account.

In addition to the "penny stock" rules described above, FINRA has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock and may have an adverse effect on the market for our shares.

Additionally, investors in penny stocks should be aware that in recent years the ability to deposit restricted shares has become significantly more difficult and expensive due to burdensome administrative requirements and finding broker-dealers willing to accept deposits of low priced securities.

Approximate Number of Holders of Common Stock

As of December 31, 2022, there were approximately 2,101 shareholders of record of our common stock, of which there is an indeterminate amount of shareholders holding shares of our common stock in street name.

Transfer Agent

The Company's stock transfer agent is ClearTrust, LLC ("ClearTrust"). ClearTrust's address is 16540 Pointe Village Drive, Suite 205, Lutz, Florida 33558 and their telephone number is (813) 235-4490. ClearTrust is owned and controlled by a person who is related to the Company's CEO.

Dividend Policy

The Company did not declare cash dividends during the years ended December 31, 2022 and 2021. It is not anticipated that cash dividends will be paid at any time in the foreseeable future as the Company intends to retain earnings, if any, for use in the development of its business. The payment of dividends is contingent upon the Company's future earnings, if any, the Company's financial condition and its capital requirements, general business conditions and other factors.

Equity Compensation Plans

The Company has not established any formal equity compensation plans as of the date of this Annual Report on Form 10-K; however, the Company reserves the right to do so at a later date.

Reports to Security Holders

Seafarer Exploration Corp. is a reporting company pursuant to the Securities and Exchange Act of 1934. As such, the Company makes available its annual report which includes audited financial statements, and its quarterly reports which include unaudited financial statements.

Recent Sales and Other Issuances of Unregistered Securities

During the year ended December 31, 2022, the Company issued 72,175,920 shares for various consulting services for board of directors' fees, advisory council fees, and fees to other service providers. The Company believes that the issuance of the securities was exempt from registration under the Securities Act of 1933, as amended, in reliance on Section 4(2) of the Securities Act as a transaction by an issuer not involving any public offering and based on the fact that such securities were issued for services to sophisticated or accredited investors and persons who are thoroughly familiar with the Company's proposed business by virtue of their affiliation with the Company.

On various dates during the year ended December 31, 2022, the Company entered into subscription agreements to sell 1,027,552,792 shares of its restricted common stock in exchange for proceeds of \$2,055,447. The proceeds received were used for general corporate purposes, working capital and the repayment of debt.

Exemptions from Registration for Sales of Restricted Securities.

The issuance of securities referenced above were issued to persons who the Company believes were either "accredited investors," or "sophisticated investors" who, by reason of education, business acumen, experience or other factors, were fully capable of evaluating the risks and merits of an investment in us; and each had prior access to all material information about us. None of these transactions involved a public offering. An appropriate restrictive legend was placed on each certificate that has been issued, prohibiting public resale of the shares, except subject to an effective registration statement under the Securities Act of 1933, as amended (the "Act") or in compliance with Rule 144. The Company believes that the offer and sale of these securities was exempt from the registration requirements of the Securities Act pursuant to Section 4(2) under the Securities Act of 1933 (the "Act") thereof, and/or Regulation D. There may be additional exemptions available to the Company.

Issuance of Securities Due to Conversion of Notes and to Settle Debt

During the year ended December 31, 2022, the Company issued 25,221,918 shares of restricted common stock to settle \$50,444 of principal and accrued interest owed on a convertible note payable. The Company also issued 500,000 shares of restricted common stock as an equity kicker to a convertible note holder. The Company believes that the offer and sale of these securities were exempt from the registration requirements of the Securities Act pursuant to Sections 3(a)(9) under the Securities Act of 1933, as amended.

Repurchase of Securities

During the years ended December 31, 2022 and 2021, the Company did not purchase any shares of its common stock and the Company is not likely to purchase any shares in the foreseeable future.

Warrants

The Company did not issue any warrants during the years ended December 31, 2022 and 2021. Please see Note 7 – Stockholders’ Deficit for a list of warrants outstanding at December 31, 2022 and 2021.

Item 6. Selected Financial Data.

Not required for smaller reporting companies.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

FORWARD LOOKING STATEMENTS

The following discussion contains certain forward-looking statements that are subject to business and economic risks and uncertainties, and which speak only as of the date of this annual report. No one should place strong or undue reliance on any forward-looking statements. The use in this Form 10-K of such words as “believes”, “plans”, “anticipates”, “expects”, “intends”, and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. The Company’s actual results or actions may differ materially from these forward-looking statements due to many factors and the success of the Company is dependent on our efforts and many other factors including, primarily, our ability to raise additional capital. Such factors include, among others, the following: our ability to continue as a going concern, general economic and business conditions; competition; success of operating initiatives; our ability to raise capital and the terms thereof; changes in business strategy or development plans; future revenues; the continuity, experience and quality of our management; changes in or failure to comply with government regulations or the lack of government authorization to continue our projects; and other factors referenced in the Form 10-K. This Item should be read in conjunction with the financial statements, the related notes and with the understanding that the Company’s actual future results may be materially different from what is currently expected or projected by the Company.

We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Such forward-looking statements are based on the beliefs and estimates of our management, as well as on assumptions made by and information currently available to us at the time such statements were made. Forward looking statements are subject to a variety of risks and uncertainties, which could cause actual events or results to differ from those reflected in the forward looking statements, including, without limitation, the failure to successfully locate cargo and artifacts from the Juno Beach shipwreck site and a number of other risks and uncertainties. Actual results could differ materially from those projected in the forward-looking statements, either as a result of the matters set forth or incorporated in this Report or due to certain economic and business factors, some of which may be beyond our control.

We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Overview

General

The Company’s principal business plan is to develop the infrastructure and technology to engage in the archaeologically-sensitive exploration, recovery and conservation of historic shipwrecks and to eventually monetize the recovery of the shipwrecks without selling the treasure by creating revenue through media and technology alternatives for different industry sectors. Once artifacts have been properly conserved, they may be made available for scientific research and allowed to be displayed for the public. The Company’s secondary business is to attempt to develop revenue streams to support its historic shipwreck exploration and recovery operations. Such revenue streams will complement the technology developed by Seafarer.

The Company has received from the Florida Department of State a notice of lack of authority to permit or deny recovery activities on the unidentified shipwreck on Juno Beach. The Florida Bureau of Archaeological Research (the "Bureau"), Division of Historical Resources, Florida Department of State stated to Seafarer "The shipwreck is non-permittable pursuant to Rule 1A-31.0045(2), F.A.C." The Bureau cited an order dated November 14, 2017 where the United States District Court entered a Final Order of Court Default and Final Judgement Granting Award for Admiralty in Rem. The District Court's order ruled "Seafarer is hereby the true, sole, and exclusive owner of the Defendant Shipwrecked Vessel and having exclusive right to conduct recovery operation on the Defendant Shipwrecked Vessel and any items recovered therefrom." Additional permitting will still be necessary with the Florida Department of Environmental Protection and the U.S. Army Corps of Engineers. Applications have been made to both entities.

In order to potentially find more efficient methods to explore and document historical shipwrecks, the Company has investigated various technologies and non-scientific methodologies. To the present date, none of these technologies have been proven to work with the exception of the SeaSearcher, which has been developed to scan historic shipwreck sites for both ferrous and nonferrous artifacts. The ongoing developmental work and improvements to the SeaSearcher have been expensive and Management anticipates that the expenses for these development costs will continue to be incurred for the foreseeable future. Advances in algorithms and artificial intelligence (AI) will continue indefinitely while the present model can be currently used in the field. The Company will continue to experiment with unproven technologies and will actively work with third parties, consultants and scientists to develop its own proprietary technology which has and will result in considerable expenses.

The Company continues to review revenue producing opportunities including joint ventures and partnerships with other companies and potentially governmental agencies. Blockchain has a strategic partnership to provide referrals to a blockchain software services provider and receive referral fees when the referrals lead to closed business for the blockchain software services company. COVID-19, pricing issues, long sales cycles, and various other reasons have considerably slowed Blockchain's progress and it has not generated any revenues during 2021 or 2022.

There is a possibility that the Company will be forced to cease its operations if it is not successful in eventually locating and recovering valuable artifacts and treasure or can't build a revenue stream to offset its expenses. If the Company were to cease its operations, and not find or engage another business entity, then it is likely that there would be complete loss of all capital invested in or borrowed by the Company. As such, an investment in Seafarer is highly speculative and very risky.

This type of business venture is highly speculative in nature and carries an excessive amount of risk. An investment in the Company's securities is very risky and should only be considered by those investors or lenders who do not require liquidity and who can afford to suffer a complete and total loss of their investment.

There is currently a limited trading market for the Company's securities. It is impossible for the Company to assure that when and if an active-trading market in its shares will be established, or whether any such market will be sustained or sufficiently liquid to enable holders of shares of the Company's common stock to liquidate their investment in our company.

The sale of restricted securities by current shareholders, including shares issued to consultants, independent contractors, Board members, as well as shares issued to settle convertible promissory notes or to settle other loans and debt, are highly dilutive and may cause a significant decline in the market price of the Company's securities. Furthermore, in recent years regulatory agencies have made it very difficult for broker dealers to accept stock certificates from issuers of low priced stocks and the Company believes that it may become even more challenging to deposit stock certificates and this trend may continue for the foreseeable future.

Moreover, in the past few years several major brokerage firms have indicated that they will not allow their clients to deposit stock certificates of low priced stocks. Some securities clearing firms who used to clear low priced securities for multiple brokerage firms have shut down or been acquired, resulting in fewer brokerage firms that are willing or able to accept lower priced securities for deposit. Unless an investor has a large and well-established relationship with a brokerage firm, it may be extremely difficult and potentially expensive to deposit lower priced securities. An investor should consider consulting with professional financial advisers before making an investment in our securities. The Company is a current and fully reporting company and has been for almost 14 years.

Plan of Operation

The Company has taken the following steps to implement its business plan:

- To date, the Company has devoted its time towards establishing its business to develop the infrastructure capable of researching, exploring, recovering and conserving historic shipwrecks. The Company has performed some research, exploration and recovery activities.
- Spent considerable time and capital researching potential shipwrecks, including obtaining information from foreign archives.
- The Company has worked in combination with its technology development partner, Wild Manta Labs, to build a research and conservation lab with full x-ray equipment and detailed metal identification analysis.
- The Company has generated very limited revenues to date. Management does not believe that the Company will generate any significant revenues for the foreseeable future.

- The Company continues to review revenue producing opportunities including joint ventures with other companies. The Company is actively looking to work with revenue producing companies. These opportunities have been slow to develop, but the Company will continue to pursue those endeavors that it believes have the potential to increase the value of the Company's shares.
- The Company has investigated various types of equipment and technology to expedite the process of finding artifacts other than iron or ferrous metals. Most have been of no help, but the Company continues to explore new technologies. The Company has developed its own proprietary technology, the SeaSearcher, and will attempt to continue to develop additional proprietary technologies or work with third parties to develop technologies to aid in its exploration and recovery operations. Development of technologies will require additional time and financing. The cost of developing the new technology has, to date, been very expensive for a small company.
- The Company has investigated media opportunities to develop content centered on its specific historic shipwreck exploration and recovery activities as well as the historic shipwreck and related historical period genre in general and will continue to evaluate various media strategies.

Other Information

There are very strict international, federal and state laws that govern the exploration and recovery of historic shipwrecks. While the Company has been able to obtain some permits, there is no guarantee that the Company will be able to secure future permits or enter into agreements with government agencies in order to explore and salvage historic shipwrecks. Seafarer believes they are the only company to be issued a full recovery permit by FBAR since 1986, other than one entity with an Admiralty Claim. This demonstrates the difficulty of obtaining a recovery permit from FBAR. There is a risk that government entities may enact legislation that is so strict that any recovery of artifacts and cargo from historic shipwrecks will be nearly impossible. Additionally, permits and agreements with governmental agencies to conduct historic shipwreck exploration and recovery operations are expensive, in terms of both direct costs and ongoing compliance costs. It is also possible that the Company will not be successful in obtaining title or permission to excavate certain wrecks, even if the law allows it. It is possible that permits that are sought for potential future international projects may never be issued, and if issued, may not be legal or honored by the entities that issued them. For the above reasons, the Company has extended its research into shipwrecks outside of State waters.

It is possible that permits that are sought for potential future international projects may never be issued, and if issued, may not be legal or honored by the entities that issued them. Governmental agencies may require various types of permits to explore shipwreck sites, and the permitting process is often lengthy and complex. Obtaining permits and entering into agreements with governmental and quasi-governmental agencies to conduct historic shipwreck exploration and recovery operations is generally a very complex, time consuming, and expensive process. Furthermore, the process of entering into agreements and/or obtaining permits may be subject to lengthy delays, possibly in excess of a year. Some governmental agencies may refuse to issue permits to the Company for recovery of artifacts or intentionally delay the permitting process, or go beyond their authority and request halting of ground disturbance.

The reasons for a lengthy permitting process may be due to a number of potential factors including but not limited to requests by permitting agencies for additional information, submitted applications that need to be revised or updated, newly discovered information that needs to be added to an application or agreement, changes to either the agreement or permit terms or revisions to other information contained in the permit, excessive administrative time lags at permitting agencies, work halts based on biased predispositions with no authority given by rule 1A-31, etc. Existing permits and agreements may be put on hold or suspended without notice for lengthy periods of time due to administrative issues and disagreements over the terms and conditions. The length of time it takes to obtain permits, enter into agreements, or rectify any conditions that are causing a permit to be suspended or on hold may cause the Company to expend significant resources while gearing up to do work with little or no visibility as to timing. An example of delays implemented by FBAR for Seafarer's permitted Area 2 in Melbourne Beach, Seafarer was prevented from performing certain activities authorized under the permit for 747 days out of the 1,095 days during the course of the last three year permit for Area 2 even though the permit was active.

The Company regularly reviews opportunities to perform exploration and recovery operations at purported historic shipwreck sites. The Company currently does have some specific plans to perform exploration and recovery operations at other shipwreck sites in the future, however these plans are subject to change based on a number of factors. The Company is actively reviewing other potential historic shipwreck sites, including sites located internationally, for possible exploration and recovery. Should the Company decide that it will pursue exploration and recovery activities at other potential shipwreck sites, it may be necessary to obtain various permits as well as environmental permits.

The Company continually monitors media rights for potential revenue opportunities. The Company has had discussions with media entities to further understand the potential advantages offered. Management believes various forms of media can represent a potential future revenue opportunity for the Company, if the right circumstances arise.

This type of business venture is extremely speculative in nature and carries a tremendous amount of risk. An investment in the Company's securities is highly speculative and very risky and should only be considered by those investors or lenders who do not require near-term liquidity and who can afford to suffer a complete and total loss of their investment.

Results of Operations

We have generated only minimal revenue from operations and do not expect to report any significant revenue from operations for the foreseeable future. We have incurred recurring losses to date. Our consolidated financial statements have been prepared assuming that we will continue as a going concern and, accordingly, do not include adjustments relating to the recoverability and realization of assets and classification of liabilities that might be necessary should we be unable to continue in operation.

The Company expects to continue to incur significant operating losses and to generate negative cash flow from operating activities, while building out its infrastructure in order to explore and salvage historic shipwreck sites and establishing itself in the marketplace. Based on our historical rate of expenditures, the Company expects to expend its available cash in less than one month from March 31, 2023.

At December 31, 2022 and 2021 the Company had working capital deficits of \$1,660,922 and \$1,668,699, respectively. The working capital deficit decreased by \$7,777, a percentage decrease of approximately 0.01%, from 2021 to 2022. Although the Company's working capital deficit decreased in 2022, such deficit may indicate that there is substantial risk to the continued viability of the Company and a high degree of risk that the Company could become insolvent due to this significant working capital deficit and the lack of meaningful cash flow from its operations. The Company is in immediate need of further working capital and is seeking options, with respect to financing, in the form of debt, equity or a combination thereof.

Since inception, the Company has funded its operations through common stock issuances and loans in order to meet its strategic objectives; however, there can be no assurance that the Company will be able to obtain further funds to continue with its efforts to establish a new business. There is a very significant risk that the Company will be unable to obtain financing to fund its operation and as such the Company may be forced to cease operations at any time which would likely result in a complete loss of all capital that has been invested in and/or borrowed by the Company to date.

The Company's ability to eliminate operating losses and to generate positive cash flow from operations in the future will depend upon a variety of factors, many of which it is unable to control. If the Company is unable to implement its business plan successfully, it may not be able to eliminate operating losses, generate positive cash flow or achieve or sustain profitability, which may have a material adverse effect on the Company's business, operations, and financial results, as well as its ability to make payments on its debt obligations, and the Company may be forced to cease operations.

If we are unable to secure additional financing, our business may fail and our stock price will likely be materially adversely affected. The Company's lack of operating cash flow and reliance on the sale of its common stock and loans to fund operations is extremely risky. If the Company is unable to continue to raise capital or obtain loans or other financing on terms that are acceptable to the Company, or at all, then it is highly likely that the Company will be forced to cease operations. If the Company ceases its operations, then it is very highly likely that all capital invested in and/or borrowed by the Company will be lost.

Summary of the Year Ended December 31, 2022 Results of Operations Compared to the Year Ended December 31, 2021

Revenue

The Company's core business involving the exploration and recovery of historic shipwrecks has not generated any revenues to date and is not expected to generate any significant revenues for the foreseeable future. During the years ended December 31, 2022 and 2021, the Company generated \$12,792 and \$23,761 in revenue respectively, which is shown as service income on the accompanying consolidated statements of operations.

Net Losses

The Company's net loss for the years ended December 31, 2022 and 2021 was \$2,616,601, and \$2,625,414, respectfully, a year-over-year decrease of approximately 0.3%.

Operating Expenses

Operating expenses were \$2,438,355 for the year ended December 31, 2022 versus \$2,369,381 for the year ended December 31, 2021, an increase of 2.9%. The increase in operating expenses in 2022 was primarily due to increases in consulting and contractor expenses, vessel maintenance and dockage expenses, and general and administrative expenses. During the year ended December 31, 2022, consulting and contractor expenses were \$1,487,446 compared to \$1,234,353 during the year ended December 31, 2021, an increase of 20.5%. Consulting and contractor expenses increased in 2022 primarily due to rising labor costs due to inflation and the Company expanded its exploration related activities. Vessel maintenance expenses were \$158,496 during 2022 versus \$109,182 during the same period in 2021, an increase of 45.2%. Vessel related expenses periodically fluctuate due to a variety of factors, during 2022 the Company incurred higher vessel related fuel and maintenance costs. Research and development expenses were \$172,877 in 2022 versus research and development expenses of \$439,816 in 2021, a decrease of approximately 60.1%. The Company believes that it will continue to expend significant resources to further develop the SeaSearcher and to begin developing next generation versions of the technology. The Company's research and development expenses were related to the continued development of its SeaSearcher autonomous underwater device. The decrease in research and development expenses in 2022 was a result of the Company focusing on the practical use of the SeaSearcher as opposed to new and early research and development of the technology which is more expensive and time consuming. The Company believes that it will continue to expend significant resources to further develop the SeaSearcher and to begin developing next generation versions of the technology. During the year ended December 31, 2022, the Company incurred professional fee related expenses of \$70,271 versus \$83,196 during the year ended December 31, 2021, a decrease of 15.5%. In 2022 the Company paid fewer legal fees than it did during 2021, however the Company anticipates that it will continue to need to pay legal fees related to shipwreck site permitting issues. General and administrative expenses for the year ended December 31, 2022 were \$406,560 compared to \$376,696 for the year ended December 31, 2021, an increase of 7.9%. General and administrative fees increased in 2022 due to the Company paying fees to rent a vessel for exploration activities. Depreciation expense was \$21,860 for the year ended December 31, 2022 and \$21,860 in 2021. Rent expense was \$46,077 in 2022 versus \$41,182 in 2021, an 11.9% year-over-year increase, which is largely attributable to inflationary conditions in the rental market, particularly in the state of Florida. Travel and entertainment expenses for the year ended December 31, 2022 were \$74,768 versus \$63,096 for the year ended December 31, 2021, an increase of 18.5%. Travel and entertainment expenses increased primarily due increased corporate activity.

Other Income (Expenses)

Other income (expense) was \$(191,218) during the year ended December 31, 2022 versus \$(279,794) during the year ended December 31, 2021. The 31.7% decrease in other income (expense) in 2022 was primarily due to decreases in loss on extinguishment of debt and interest expense. Interest expense for the year ended December 31, 2022 was \$62,268 versus \$177,499 for the same period in 2021, a decrease of 65.0%. The decrease in interest expense was mostly due to a decrease in the amortization of interest relating to the beneficial conversion features of several convertible notes. Loss on extinguishment of debt was \$43,950 during the year ended December 31, 2022 versus \$121,847 during the same period in 2021. Net loss on settlement of accounts payable was \$0 during the year ended December 31, 2022 versus \$448 for the same period in 2021. Gain on sale of asset was \$0 during the year ended December 31, 2022 versus \$20,000 in the same period in 2021. The gain on disposal of asset in 2021 was due to the sale of one of the Company's salvage vessels that had been fully depreciated. During the year ended December 31, 2022, loss on sale of asset was \$85,000 versus \$0 in 2021. The loss on sale of asset in 2022 was due to the Company writing off the value of a boat that it was leasing and had agreed to purchase. The Company decided to write off the value of the boat because it became damaged. The gain on sale of asset in 2021 was due to the sale of one of the Company's salvage vessels that had been fully depreciated.

Cash Flows from Operating Activities

For the year ended December 31, 2022 net cash flows used in operating activities was \$1,989,194.

For the year ended December 31, 2021 net cash flows used in operating activities was \$1,715,582.

Cash flows used in operating activities increased in 2022 due to the increase in the amortization of unearned compensation, and the loss on the disposal of a boat related asset.

Cash Flows from Investing Activities

For the year ended December 31, 2022 net cash flows used in investing activities was \$(145).

For the year ended December 31, 2021 net cash flows provided by investing activities was \$20,000.

Cash flows used in investing activities decreased due to the Company not receiving the proceeds from the disposal of an asset in 2022, whereas in 2021 the Company received \$20,000 from the sale of assets.

Cash Flows from Financing Activities

For the year ended December 31, 2022 net cash provided by financing activities was \$2,084,947.

For the year ended December 31, 2021 net cash provided by financing activities was \$1,590,510.

Cash flows provided by financing activities primarily increased in 2022 due to an increase in the proceeds from the issuance of common stock and proceeds from the issuance of convertible notes payable and convertible notes payable to related parties.

Liquidity and Capital Resources

At December 31, 2022, the Company had \$177,409 cash in the bank. During the years ended December 31, 2022 and 2021 the Company incurred net losses of \$2,616,601 and \$2,625,414, respectively. At December 31, 2022, the Company had \$178,159 in current assets and \$1,839,081 in current liabilities, leaving the Company a working capital deficit of \$1,660,922.

Lack of Liquidity

A major financial challenge and significant risk facing the Company is a lack of positive cash flow and liquidity. The Company continued to operate with significant debt and a working capital deficit during the year ended December 31, 2022. This working capital deficit indicates that the Company is unable to meet its short-term liabilities with its current assets. This working capital deficit is extremely risky for the Company as it may be forced to cease its operations due to its inability to meet its current obligations. If the Company is forced to cease its operations, then it is highly likely that all capital invested in and/or borrowed by the Company will be lost.

The expenses associated with being a small publicly traded company attempting to develop the infrastructure to explore and salvage historic shipwrecks recovery are extremely prohibitive, especially given that the Company does not currently generate any significant revenues and does not expect to generate any significant revenues in the near future. There are ongoing expenses associated with operations that are incurred whether the Company is conducting shipwreck recovery operations or not. Vessel maintenance, upkeep expenses and docking fees are continuous and unavoidable regardless of the Company's operational status. Management anticipates that the vessels utilized by the Company in its operations will need continuous and unavoidable repairs and maintenance, particularly if the Company ramps up its operational footprint and is working on more than one site simultaneously as anticipated. These repairs and maintenance are expensive and have a negative impact on the Company's cash position.

In addition to the operation expenses, a publicly traded company also incurs the significant recurring corporate expenses related to maintaining publicly traded status, which include, but are not limited to accounting, legal, audit, executive, administrative, corporate communications, rent, telephones, etc. The recurring expenses associated with being a publicly traded company are very burdensome for smaller public companies such as Seafarer. This lack of liquidity creates a very risky situation for the Company in terms of its ability to continue operating, which in turn makes owning shares of the Company's common stock extremely risky and highly speculative. The Company's lack of liquidity may cause the Company to be forced to cease operations at any time which would likely result in a complete loss of all capital invested in or borrowed by the Company to date.

Due to the fact that the Company does not generate any revenues and does not expect to generate revenues for the foreseeable future it must rely on outside equity and debt funding. The combination of the ongoing operating expenses that must be met even during times when there is little or no exploration or recovery activities taking place, and corporate expenses, creates a very risky situation for the Company and its shareholders in terms of the need to access external financing to fund operations. This working capital shortfall and lack of access to cash to fund corporate activities is extremely risky and may force the Company to cease its operations which would more than likely result in a complete loss of all capital invested in or loaned to the Company to date.

Lack of Revenues and Cash Flow/Significant Losses from Operations

The exploration and recovery of historic shipwrecks requires a multi-year, multi-stage process and it may be many years before any significant revenue is generated from exploration and recovery activities, if ever. The Company does not believe that it will generate any significant revenues in the near future. The Company believes that it may be several years before it is able to generate any cash flow from its operations, if any are ever generated at all. Without revenues and cash flow the Company does not have reliable cash flow to pay its expenses. The Company relies on outside financing in the form of equity and debt and it is possible that the Company may not be able to obtain outside financing in the future. If the Company is not able to obtain financing it would more than likely be forced to cease operations and all of the capital that has been invested in or borrowed by the Company would be lost.

If the Company is unable to secure additional financing, our business may fail or our operating results and our stock price may be materially adversely affected. The raising of additional financing would in all likelihood result in dilution or reduction in the value of the Company's securities.

The Company may not be able to continue as a going concern. If the Company is not able to continue as a going concern, it is highly likely that all capital invested in the Company or borrowed by the Company will be lost. The report of our independent auditors for the years ended December 31, 2022 and 2021 raises substantial doubt as to our ability to continue as a going concern. As discussed in Note 2 to our consolidated financial statements for the years ended December 31, 2022 and 2021, we have experienced operating losses in every year since our inception resulting in an accumulated deficit. Our independent auditors believe, based on our financial results as of December 31, 2022, that such results raised substantial doubts about the Company's ability to continue as a going concern. If the Company is not able to continue as a going concern, it is highly likely that all capital invested in the Company or borrowed by the Company will be lost.

The Company has experienced a net loss in every fiscal year since inception. The Company's losses from operations were \$2,425,383 for the year ended December 31, 2022 and \$2,345,620 for the year ended December 31, 2021. The Company believes that it will continue to generate losses from its operations for the foreseeable future and the Company may not be able to generate positive cash flow or a profit in the long-term, or ever.

Convertible Notes Payable and Notes Payable, in Default

The Company does not have additional sources of debt financing to refinance its convertible notes payable and notes payable that are currently in default. If the Company is unable to obtain additional capital, such lenders may file suit, including suit to foreclose on the assets held as collateral for the obligations arising under the secured notes. If any of the lenders file suit to foreclose on the assets held as collateral, then the Company may be forced to significantly scale back or cease its operations which would more than likely result in a complete loss of all capital that has been invested in or borrowed by the Company. The fact that the Company is in default regarding several loans held by various lenders makes investing in the Company or providing any loans to the Company extremely risky with a very high potential for a complete loss of capital.

The convertible notes that have been issued by the Company are convertible at the lender's option. These convertible notes represent significant potential dilution to the Company's current shareholders as the convertible price of these notes is generally lower than the current market price of the Company's shares. As such when these notes are converted into equity there is typically a highly dilutive effect on current shareholders and very high probability that such dilution may significantly negatively affect the trading price of the Company's common stock. Furthermore, management intends to have discussions or has already had discussions with several of the promissory note holders who do not currently have convertible notes regarding converting their notes into equity. Any such amended agreements to convert promissory notes into equity would more than likely have a highly dilutive effect on current shareholders and there is a very high probability that such dilution may significantly negatively affect the trading price of the Company's common stock. Some of these note holders have already amended their notes and converted the notes into equity. Based on conversations with other note holders, the Company believes that additional note holders will amend their notes to contain a convertibility clause and eventually convert the notes into equity.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments which affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities (see Note 3, Summary of Significant Accounting Policies, contained in the notes to the Company's consolidated financial statements for the years ended December 31, 2022 and 2021 contained in this filing). On an ongoing basis, we evaluate our estimates. We base our estimates on historical experience and on various other assumptions which we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities which are not readily apparent from other sources. Actual results may differ from these estimates based upon different assumptions or conditions; however, we believe that our estimates are reasonable.

Management is aware that certain changes in accounting estimates employed in generating financial statements can have the effect of making the Company look more or less profitable than it actually is. Management does not believe that the Company has made any such changes in accounting estimates.

Off-balance Sheet Arrangements

None.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Not required.

Item 8. Financial Statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

March 31, 2023

To the Board of Directors of Seafarer Exploration Corp.

In connection with our audit of the consolidated financial statements of Seafarer Exploration Corp. for the year ended December 31, 2022, we will issue our report thereon dated March 31, 2023. Professional standards require that we provide you with the following information related to our audit.

Significant and Critical Accounting Policies and Practices

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The Company's significant accounting policies are disclosed in the notes to the financial statements as required by generally accepted accounting principles. As described in Note 3, the Company changed accounting policies related to convertible debentures by adopting FASB Accounting Standards Update No. 2020-06, "Accounting for Convertible Instruments and Contracts in an Entity's Own Equity", in 2022. Accordingly, the accounting change has been adopted utilizing the modified retrospective method, which resulted in an immaterial impact to the Company. We noted no transactions entered into by the Company during the year for which accounting policies are controversial or for which there is a lack of authoritative guidance or consensus or diversity in practice.

Critical accounting policies and practices are those that are both most important to the portrayal of the Company's financial condition and results and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain. The critical accounting policies used by Seafarer Exploration Corp. in its 2022 consolidated financial statements are described in Note 3 to the consolidated financial statements and relate to the policies the Company uses to recognize revenue and account for the fair value of financial instruments due to the nature of the items.

Critical Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Critical accounting estimates are estimates for which (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material. The Company's critical accounting estimate affecting the consolidated financial statements was:

Management's estimate used in the calculation of the lease liability is based on certain factors and inputs that have been determined by management. We evaluated the key factors and assumptions used to develop the value in determining that it is reasonable in relation to the consolidated financial statements taken as a whole.

Management's estimate used in the determination of recording debt and equity transactions is based on certain factors and inputs that have been determined by management. We evaluated the key factors and assumptions used to develop the value in determining that it is reasonable in relation to the consolidated financial statements taken as a whole.

Significant Unusual Transactions

For purposes of this letter, professional standards define *significant unusual transactions* as transactions that are outside the normal course of business for the Company or that otherwise appear to be unusual due to their timing, size or nature. We noted no significant unusual transactions during our audit.

Related Party Relationships and Transactions

As part of our audit, we evaluated the Company's identification of, accounting for, and disclosure of the Company's relationships and transactions with related parties as required by professional standards. We noted no related parties or related party relationships or transactions that were previously undisclosed to us; significant related-party transactions that have not been approved in accordance with the Company's policies or procedures or for which exceptions to the Company's policies or procedures were granted; or significant related party transactions that appeared to lack a business purpose.

Quality of the Company's Financial Reporting

Management is responsible not only for the appropriateness of the accounting policies and practices, but also for the quality of such policies and practices. Our responsibility under professional standards is to evaluate the qualitative aspects of the company's accounting practices, including potential bias in management's judgments about the amounts and disclosures in the financial statements, and to communicate the results of our evaluation and our conclusions to you. There were no items noted that require communication with you.

Uncorrected and Corrected Misstatements

Professional standards require us to accumulate misstatements identified during the audit, other than those that are clearly trivial, and to communicate accumulated misstatements to management. The schedule below summarizes the uncorrected misstatements that we presented to management, other than those that are clearly trivial, that, in our judgment, may not have been detected except through our auditing procedures. There were no corrected misstatements noted during the audit.

Management has determined that the effects of the uncorrected misstatements are immaterial, both individually and in the aggregate, to the consolidated financial statements as a whole. The uncorrected misstatements or the matters underlying them could potentially cause future period financial statements to be materially misstated, even though, in our judgment, such uncorrected misstatements are immaterial to the financial statements under audit.

Account	Description	Debit	Credit
Proposed JE # 2			
To properly record interest expense			
2450	Accrued Interest	1,401.00	
6900	Interest Expense		1,401.00
Total		1,401.00	1,401.00
Proposed JE # 3			
To properly record legal retainer as prepaid			
1250	Prepaid Consulting Expense	18,682.00	
7000	Legal Fees		18,682.00
Total		18,682.00	18,682.00
Proposed JE # 4			
To properly record consulting expense			
6200	Consulting Expenses - Corp.	2,000.00	
2000	Accounts Payable		2,000.00
Total		2,000.00	2,000.00

Auditor's Report

In connection with the audit of the consolidated financial statements, we have provided you a draft of our auditor's report, and we discussed the draft of our auditor's report with you, including the identification of critical audit matters associated with the accounting for stock based compensation. We have identified these items as critical audit matters as they relate to accounts or disclosures that are material to the financial statements and involved our especially challenging, subjective, or complex judgments.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter that could be significant to the financial statements or the auditor's report. We are pleased to report that no disagreements with management arose during the course of our audit.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Other Information in Documents Containing Audited Financial Statements

The Company's audited consolidated financial statements are included in its annual report. Our responsibility for the other information contained in the annual report does not extend beyond the financial information identified in our audit report. We do not have an obligation to perform any procedures to corroborate the other information contained in the annual report. However, we read the other information and considered whether such information (including the manner of its presentation) contained a material misstatement of fact or was materially inconsistent with information appearing in the financial statements. Nothing came to our attention that caused us to believe that such information (including the manner of its presentation) contained a material misstatement of fact or was materially inconsistent with the information appearing in the financial statements.

This information is intended solely for the use of the Audit Committee, Board of Directors, and management of Seafarer Exploration Corp. and is not intended to be, and should not be, used by anyone other than these specified parties.

Very truly yours,

Accu Audit & Compliance, PA

Tampa, Florida

SEAFARER EXPLORATION CORP.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – DESCRIPTION OF BUSINESS

Seafarer Exploration Corp. (“Seafarer” or the “Company”), was incorporated on May 28, 2003 in the State of Delaware.

The principal business of the Company is to engage in the archaeologically-sensitive exploration, documentation, recovery, and conservation of historic shipwrecks with the objective of exploring and discovering Colonial-era shipwrecks for future generations to be able to appreciate and understand.

In March of 2014, Seafarer entered into a partnership with Marine Archaeology Partners, LLC (“MAP”), with the formation of Seafarer’s Quest, LLC (“SQ”) for the purpose of exploring a shipwreck site off of Melbourne Beach, Florida. Under the partnership with MAP, Seafarer is the designated manager of SQ.

The Company’s wholly owned subsidiary Blockchain LogisTech, LLC (“Blockchain”), was formed on April 4, 2018 and began operations in 2019. The Company is evaluating Blockchain’s business opportunities and does not believe that Blockchain will generate any significant revenues for the foreseeable future.

The Company formed a wholly owned subsidiary, Exploration Studios, LLC, in May 2018 in order to explore media strategies and opportunities. Exploration Studios, LLC has not yet commenced operations.

Florida Division of Historical Resources Agreements/Permits

The Company successfully renewed its permits for both Areas 1 and 2 for the Melbourne Beach site. The Area 1 permit was renewed on March 1, 2019 for a period of three years. The Area 2 permit was renewed on January 14, 2019 for a period of three years. Per Florida Statutes, Seafarer made a timely request for renewal of the 2019 permit for Area 2 on July 29, 2021. In January of 2022, Seafarer received notification from the Florida Division of Historical Resources (“FDHR”) that its permit for Area 2, which was set to expire on January 19, 2022, has been continued indefinitely while the renewal request was being processed. The existing permits will continue until the renewal is finalized or rejected. Per Florida Statutes, Seafarer made a timely request for renewal of the 2019 permit for Area 1 on July 29, 2021. On March 2, 2022, Seafarer received notification that the permit would continue indefinitely with the same terms as Area 2.

Federal Admiralty Judgement

Seafarer was granted, through the United States District Court for the Southern District of Florida, a final judgment for its federal admiralty claim on the Juno Beach shipwreck site. The Company is conducting limited exploration operations at the Juno Beach shipwreck site while it awaits updated permitting from the Army Corp of Engineers.

Blockchain Software Services Referral Agreements

Management is reviewing potential alternate plans for Blockchain and believes that it is highly unlikely that Blockchain will generate any revenues for the foreseeable future, if ever.

NOTE 2 – GOING CONCERN

These consolidated financial statements have been prepared on a going concern basis, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred net losses since inception and has an accumulated deficit of \$25,166,812 as of December 31, 2022. During the year ended December 31, 2022, the Company’s net loss was \$2,616,601 and at December 31, 2022, the Company had a working capital deficit of \$1,660,922. These factors raise substantial doubt about the Company’s ability to continue as a going concern. Based on its historical rate of expenditures, the Company expects to expend its available cash in less than one month from March 31, 2023. Management’s plans include raising capital through the issuance of common stock and debt to fund operations and, eventually, the generation of revenue through its business. The Company does not expect to generate any significant revenues for the foreseeable future. The Company is in immediate need of further working capital and is seeking options, with respect to financing, in the form of debt, equity or a combination thereof.

Failure to raise adequate capital and generate adequate revenues could result in the Company having to curtail or cease operations. The Company’s ability to raise additional capital through the future issuances of the common stock is unknown. Additionally, even if the Company does raise sufficient capital to support its operating expenses and generate adequate revenues, there can be no assurances that the revenue will be sufficient to enable it to develop to a level where it will generate profits and cash flows from operations. These matters raise substantial doubt about the Company’s ability to continue as a going concern; however, the accompanying consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. These consolidated financial statements do not include any adjustments relating to the recovery of the recorded assets or the classifications of the liabilities that might be necessary should the Company be unable to continue as a going concern.

Covid-19 Disclosure

The COVID-19 global pandemic may have a serious negative affect on the Company's operations and business. It is possible that this ongoing global pandemic may cause the Company to have to significantly delay or suspend its operations, which would likely result in a material adverse impact on its business and financial positions.

Furthermore, the Company may be unable to raise sufficient capital due to COVID-19's effects on the general economy and the capital markets. If the Company is not able to obtain financing due to COVID-19, then it is highly likely that it will be forced to cease operations. Smaller companies such as Seafarer, who lack significant revenues, earnings and cash flows as well as who lack diversified business operations are particularly vulnerable to having to potentially cease operations due to the effects of COVID-19. If the Company were to be unable to raise capital and cease its operations then it would be highly likely that the Company would not survive and lenders and investors would suffer a complete loss of all capital loaned to or invested in the Company.

Current Economic Conditions

The Company and certain of its advisors are closely monitoring current domestic economic conditions. Of particular concern is that the rate of inflation that has been reported to be near a 40 year high in 2022 and continues to be elevated when compared to historical averages. Inflationary pressures have resulted in an increase in the cost of fuel and labor. The Company's vessels use large amounts of fuel when in operation and the recent rise in the per gallon cost of gasoline will cause an increase in the Company's operating expenses. The higher cost of fuel may hamper the Company's ability to conduct operations. The increasing inflation in the overall economy has also lead to higher interest rates which may make it more expensive or potentially more challenging for the Company to access financing.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of Seafarer Exploration Corp. is presented to assist in understanding the Company's consolidated financial statements. The consolidated financial statements and notes are representations of the Company's management, who are responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America ("GAAP") and have been consistently applied in the preparation of the consolidated financial statements.

Principles of Consolidation

The consolidated financial statements of the Company include the accounts of the Company and Blockchain, which is a wholly owned subsidiary. Intercompany accounts and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Company considers all highly liquid investments and short-term debt instruments with original maturities of three months or less to be cash equivalents. There were no cash equivalents at December 31, 2022 and 2021. Financial instruments that potentially subject the Company to concentration of credit risk consist principally of cash deposits. Accounts at each institution are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. During the years ended December 31, 2022 and 2021, the Company had a concentration of cash in one bank. At December 31, 2022, the Company did not have deposits in excess of the FDIC insured limit.

Research and Development Expenses

Expenditures for research and development are expensed as incurred. The Company incurred research and development expenses of \$172,877 and \$439,816 for the years ended December 31, 2022 and 2021, respectively.

Revenue Recognition

The Company recognizes revenue in accordance with the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") Topic 606, "*Revenue from Contracts with Customers*" ("ASC 606") and all the related amendments.

The core principle of ASC 606 requires that an entity recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. ASC 606 defines a five-step process to achieve this core principle and, in doing so, it is possible more judgment and estimates may be required within the revenue recognition process than required under GAAP, including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation.

The Company recognizes revenue from the referrals that Blockchain has made to providers of software services when payment for a referral is received from the provider of software services. Blockchain, at its sole discretion and with no specific sales quotas or targets, provides referrals of potential end users to the software service providers and is paid a referral fee only after the software services providers receive payment from the end user.

The Company also has a separate sales referral agreement, with no sales quotas or specific goals or targets, with a limited liability company that provides product/system engineering and development services. The Company's performance obligation is met when the payment from the customer is received by the provider of the development services, which is at a point in time. The Company receives referral fees when payment is received from the provider of the product/system development services which is when the Company recognizes revenue under the agreement.

The Company recognizes revenue when cash is received or when it has met its obligations per the terms of a contract or agreement for services. Payments received for services not yet provided are recorded as deferred revenue and are recognized as revenue when the services have been provided.

During the year ended December 31, 2021, the Company entered into an agreement to provide scanning services using its SeaSearcher technology to a corporation involved in searching for historic shipwreck material. Under the terms of the agreement the Company received an upfront payment of \$140,000 which has been included in the accompanying consolidated balance sheets at December 31, 2022 and 2021 as deferred revenue, as the services have not yet been provided.

Earnings Per Share

The Company has adopted FASB ASC 260-10, which provides for the calculation of "basic" and "diluted" earnings per share. Basic earnings per share includes no dilution and is computed by dividing net income or loss available to common stockholders by the weighted average common shares outstanding for the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity.

The potentially dilutive common stock equivalents for the years ended December 31, 2022 and 2021 were excluded from the dilutive loss per share calculation as they would be antidilutive due to the net loss. As of December 31, 2022 and 2021, there were approximately 681,658,102 and 648,056,162 shares of common stock underlying our outstanding convertible notes payable and warrants, respectively.

Fair Value of Financial Instruments

The carrying amounts of financial assets and liabilities, such as cash, accounts payable, accrued expenses, convertible notes payable and payables, approximate their fair values because of the short maturity of these instruments.

Property, Plant and Equipment

Property, plant and equipment are recorded at historical cost. Depreciation is computed on the straight-line method over the estimated useful lives of the respective assets. During the year ended December 31, 2019, the Company purchased a vessel with an estimated useful life of ten years. During the year ended December 31, 2020 the Company purchased a vehicle with an estimated useful life of seven years. As of December 31, 2022, these are the only capital assets owned by the Company.

Depreciation expense was \$21,860 for the years ended December 31, 2022 and 2021, which is included in operating expenses in the accompanying consolidated statements of operations.

Impairment of Long-Lived Assets

In accordance with ASC 360-10, the Company, on a regular basis, reviews the carrying amount of long-lived assets for the existence of facts or circumstances, both internally and externally, that suggest impairment. The Company determines if the carrying amount of a long-lived asset is impaired based on anticipated undiscounted cash flows, before interest, from the use of the asset. In the event of impairment, a loss is recognized based on the amount by which the carrying amount exceeds the fair value of the asset. Fair value is determined based on the appraised value of the assets or the anticipated cash flows from the use of the asset, discounted at a rate commensurate with the risk involved. There were no impairment charges recorded during the years ended December 31, 2022 and 2021.

Use of Estimates

The process of preparing consolidated financial statements in conformity with GAAP requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenses. Significant estimates for the years ended December 31, 2022 and 2021 include useful life of property, plant and equipment, valuation allowances against deferred tax assets and the fair value of non cash equity transactions.

Segment Information

During 2019, Seafarer's wholly owned subsidiary, Blockchain began operations, generated revenue and incurred expenses. The business of Blockchain has no relation to the Company's shipwreck exploration and recovery operations other than common ownership. As such, the Company concluded that the operations of Blockchain and Seafarer Exploration were separate reportable segments as of the years ended December 31, 2022 and 2021 (see Note 10 – Segment Information).

Convertible Debentures

The Company adopted the guidance in Accounting Standards Updated (“ASU”) 2020-06, *Accounting for Convertible Instruments and Contracts in an Entity’s Own Equity* on January 1, 2022. ASU 2020-06 simplifies an issuer’s accounting for convertible instruments and its application of the derivatives scope exception for contracts in its own equity. Additionally, ASU 2020-06 removes the requirements for accounting for beneficial conversion features. The Company adopted ASU 2020-06 utilizing the modified retrospective method, which resulted in an immaterial impact to the Company.

Stock Based Compensation

The Company applies the fair value method of FASB ASC 718, *Share Based Payment*, in accounting for its stock-based compensation. The standard states that compensation cost is measured at the grant date based on the fair value of the award and is recognized over the service period. The Company values stock-based compensation at the market price for the Company’s common stock and other pertinent factors at the grant date.

Fully vested and non-forfeitable shares issued prior to the services being performed are classified as prepaid expenses.

Leases

The Company accounts for leases under Accounting Standards Update (“ASU”) 2016-02. At the inception of a contract the Company assesses whether the contract is, or contains, a lease. The Company’s assessment is based on: (1) whether the contract involves the use of a distinct identified asset, (2) whether the Company obtains the right to substantially all the economic benefit from the use of the asset throughout the period, and (3) whether it has the right to direct the use of the asset. The Company will allocate the consideration in the contract to each lease component based on its relative stand-alone price to determine the lease payments.

Operating lease right of use (“ROU”) assets represents the right to use the leased asset for the lease term and operating lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at commencement date. As most leases do not provide an implicit rate, the Company uses an incremental borrowing rate based on the information available at the adoption date in determining the present value of future payments. Lease expense for minimum lease payments is amortized on a straight-line basis over the lease term and is presented in operating expenses on the consolidated statements of operations.

As permitted under the new guidance, the Company has made an accounting policy election not to apply the recognition provisions of the guidance to short term leases (leases with a lease term of twelve months or less that do not include an option to purchase the underlying asset that the lessee is reasonably certain to exercise); instead, the Company will recognize the lease payments for short term leases on a straight-line basis over the lease term.

Income Taxes

Income taxes are computed using the asset and liability method. Under the asset and liability method, deferred income tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities and are measured using the currently enacted tax rates and laws. A valuation allowance is provided for the amount of deferred tax assets that, based on available evidence, are not expected to be realized.

Recent Accounting Pronouncements

All other recent accounting pronouncements issued by the FASB, did not or are not believed by management to have a material impact on the Company’s present or future consolidated financial statements.

NOTE 4 – OPERATING LEASE RIGHT-OF-USE ASSETS AND OPERATING LEASE LIABILITIES

Operating lease right-of-use assets and liabilities are recognized at the present value of the future lease payments at the lease commencement date. The interest rate used to determine the present value is the incremental borrowing rate, estimated to be 10%, as the interest rate implicit in most of the Company’s leases are not readily determinable. Operating lease expense is recognized on a straight-line basis over the lease term. During the years ended December 31, 2022 and 2021, the Company recorded \$18,403, as operating lease expense, which is included in rent expense on the consolidated statements of operations.

The Company leases 823 square feet of office space located at 14497 North Dale Mabry Highway, Suite 209-N, Tampa, Florida 33618. During the year ended December 31, 2019 and through June 30, 2020 the Company paid \$1,252 per month to lease the office space. The Company entered into an amended lease agreement commencing on July 1, 2020 through July 31, 2023 with base month rents of \$1,475 from July 1, 2020 to June 30, 2021, \$1,519 from July 1, 2021 to June 30, 2022, \$1,564 from July 1, 2022 to June 30, 2023 and \$1,611 from July 1, 2023 to July 31, 2023. Under the terms of the lease there may be additional fees charged above the base monthly rental fee.

In adopting Topic 842, the Company has elected the 'package of practical expedients', which permits the Company not to reassess under the new standard its prior conclusions about lease identification, lease classification and initial direct costs. The Company did not elect the use-of-hindsight or the practical expedient pertaining to land easements; the latter is not applicable to the Company. As permitted under the new guidance, the Company has made an accounting policy election not to apply the recognition provisions of the new guidance to short term leases (leases with a lease term of twelve months or less that do not include an option to purchase the underlying asset that the lessee is reasonably certain to exercise); instead, the Company will recognize the lease payments for short term leases on a straight-line basis over the lease term. On July 1, 2020, upon renewal of the lease, the Company recorded a right-of-use asset and lease liability of \$48,957.

Right-of-use assets at December 31, 2022 and 2021 are summarized below:

	December 31, 2022	December 31, 2021
Office lease	\$ 48,957	\$ 48,957
Less accumulated amortization	(38,493)	(21,946)
Right of use assets, net	<u>\$ 10,464</u>	<u>\$ 27,011</u>

Amortization on the right -of -use asset is included in rent expense on the consolidated statements of operations.

Operating lease liabilities are summarized below:

	December 31, 2022	December 31, 2021
Office lease	\$ 10,807	\$ 27,594
Less: current portion	(10,807)	(16,876)
Long term portion	<u>\$ -</u>	<u>\$ 10,718</u>

Maturity of lease liabilities are as follows:

Year ended December 31, 2023	\$ 11,080
Total future minimum lease payments	11,080
Less: Present value discount	(273)
Lease liability	<u>\$ 10,807</u>

The Company also has an operating lease for a house located in Palm Bay, Florida that it leases on a month-to-month basis for \$1,300 per month. The Company uses the house to store equipment and gear and to provide temporary work-related living quarters for its divers, personnel, consultants and independent contractors involved in its exploration and recovery operations. The Company also pays a rental fee for a space in a park on an as needed basis.

NOTE 5 – CONVERTIBLE NOTES PAYABLE AND NOTES PAYABLE

Convertible Notes Payable

The following table reflects the convertible notes payable as of December 31, 2022 and 2021:

	Issue Date	Maturity Date	December 31, 2022 Principal Balance	December 31, 2021 Principal Balance	Rate	Conversion Price
Convertible notes payable - related parties

The convertible notes payable are convertible into a fixed number of shares and with no down round protection features. The Company accounted for the beneficial conversion features based on the intrinsic value at the date of issuance. During the years ended December 31, 2022 and 2021, the Company recognized beneficial conversion features totaling \$0 and \$6,000, respectively. The discount from the beneficial conversion features are being amortized through charges to interest expense over the term of the convertible notes payable. For the years ended December 31, 2022 and 2021, the Company recorded interest expense related to the amortization of debt discounts in the amount of approximately \$3,864 and \$40,000, respectively, which is included in interest expense on the consolidated statements of operations.

New Convertible Notes Payable Issued During the Years Ended December 31, 2022 and 2021

During the year ended December 31, 2022, the Company entered into the following Convertible Notes Payable and Notes Payable Agreements:

In July of 2022, the Company entered into a convertible promissory note agreement in the amount of \$20,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest is due on or before January 6, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.0015 per share.

In July of 2022, the Company entered into a convertible promissory note agreement in the amount of \$10,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest is due on or before January 29, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.002 per share.

In August of 2022, the Company entered into a convertible promissory note agreement in the amount of \$10,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest is due on or before February 4, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.002 per share.

In August of 2022, the Company entered into a promissory note agreement in the amount of \$5,000 with a related party. This note paid interest at a rate of 6% per annum and the principal and accrued interest was due on or before August 26, 2022. The lender received 500,000 shares of the Company's restricted common stock as a loan origination fee. The note was repaid and the balance at December 31, 2022 was \$0.

In August of 2022, the Company entered into a convertible promissory note agreement in the amount of \$50,000 with an individual. This note pays interest at a rate of 6% per annum and the principal and accrued interest was due on or before September 29, 2022. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.002 per share. This convertible note payable was converted during 2022.

During the year ended December 31, 2021, the Company entered into the following Convertible Notes Payable and Notes Payable Agreements:

In October of 2021, the Company entered into a convertible promissory note agreement in the amount of \$3,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 2% per annum and the principal and accrued interest is due on or before April 13, 2022. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.0020 per share. This convertible note payable is in default due to non payment of principal and accrued interest.

In November of 2021, the Company entered into a convertible promissory note agreement in the amount of \$3,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 2% per annum and the principal and accrued interest is due on or before May 10, 2022. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.0020 per share. This convertible note payable is in default due to non payment of principal and accrued interest.

Note Conversions

During the year ended December 31, 2022:

The Company issued 25,221,918 shares of restricted common stock with a total share value of \$73,117 to a related party to settle \$50,444 of the principal and accrued interest owed on a convertible note payable that was due on September 29, 2022.

During the year ended December 31, 2021:

The Company issued 8,734,640 shares of restricted common stock to a related party to settle \$20,302 of accrued interest owed on sixteen convertible notes payable with a total share value of \$57,648.

The Company issued 15,594,247 shares of restricted common stock to a convertible note holder to settle \$45,000 of the principal balance and \$1,783 of accrued interest on a convertible note payable with a total share value of \$79,530.

The Company issued 35,615,390 shares of restricted common stock to a convertible note holder to settle \$73,000 of the principal balance and \$28,761 of accrued interest on four convertible notes payable with a total share value of \$146,024.

Repayment of Promissory Note

During the year ended December 31, 2022, the Company repaid a total of \$50,213 of the principal and accrued interest of a promissory note with an original principal balance of \$50,000 that was due on January 8, 2022.

During the years ended December 31, 2022 and 2021, the Company repaid a total of \$10,000 and \$2,000, respectively, of the principal of a promissory note with an original principal balance of \$75,000 that was due on December 14, 2018. The remaining principal balance of the note at December 31, 2022 was \$8,000.

Shareholder Loan

At December 31, 2022 the Company had the following loans outstanding to its CEO in the total amounts of \$7,400 as follows:

- A loan with no due date with a remaining balance of \$1,500 and an interest rate of 2% and a conversion rate of \$0.0005;
- A loan due on January 22, 2022 with a remaining balance of \$1,400 and an interest rate of 1%;
- A loan due on January 26, 2022 with a remaining balance of \$1,000 and an interest rate of 1%; and
- A loan due on September 9, 2022 with a remaining balance of \$3,500, and an interest rate of 1%.

At December 31, 2021, the Company had the following loans outstanding to its CEO in the aggregate amount of \$7,900:

- A loan with no due date with a \$1,500 remaining balance and an interest rate of 2% and a conversion rate of \$0.0005;
- A loan due on October 26, 2021 with a remaining balance of \$4,000 and an interest rate of 1%;
- A loan due on January 22, 2022 with a remaining balance of \$1,400 and an interest rate of 1%; and
- A loan due on January 26, 2022 with a remaining balance of \$1,000 and an interest rate of 1%;

Repayment of Shareholder Loan

During the year ended December 31, 2022 the Company repaid its CEO \$3,017 of the principal balance and accrued interest for a loan dated May 17, 2022 that had an original principal balance of \$3,000 and \$4,078 of the principal balance plus accrued interest for a loan dated April 26, 2021 that had an original principal balance of \$6,000.

During the year ended December 31, 2021 the Company repaid its CEO \$2,000 for a loan dated April 26, 2021 that had an original principal balance of \$6,000.

Collateralized Promissory Notes

Two convertible notes outstanding with related parties, dated January 9, 2009 and January 18, 2012 are collateralized by Company assets.

Convertible Notes Payable and Notes Payable, in Default

The Company does not have additional sources of debt financing to refinance its convertible notes payable and notes payable that are currently in default. If the Company is unable to obtain additional capital, such lenders may file suit, including suit to foreclose on the assets held as collateral for the obligations arising under the secured notes. If any of the lenders file suit to foreclose on the assets held as collateral, then the Company may be forced to significantly scale back or cease its operations, which would more than likely result in a complete loss of all capital that has been invested in or borrowed by the Company. The fact that the Company is in default of several promissory notes held by various lenders makes investing in the Company or providing any loans to the Company extremely risky with a very high potential for a complete loss of capital.

NOTE 6 – IMPAIRMENT OF ASSET

During 2022, the Company entered into an agreement with a corporation to lease a boat for use in its operations. Under the agreement the Company agreed to pay the owner of the boat \$2,000 per month until a total of \$85,000 was paid, at which point title of the boat would be transferred to the Company. The boat was damaged while in use and the Company has agreed to pay the boat's owner the full value of the contractual agreement for the lease purchase of the boat. The Company has estimated a full loss on the boat during the year ended December 31, 2022 and wrote off the contractual value of the boat, \$85,000, which is included in the consolidated statements of operations as a loss on disposal of asset. The amount due as of December 31, 2022 of \$85,000 has been included in the accompanying consolidated balance sheets in accounts payable and accrued expenses.

NOTE 7 – STOCKHOLDERS' DEFICIT

The Company's total authorized capital stock consists of 9,900,000,000 shares of common stock, \$0.0001 par value per share.

Preferred Stock

The Company is authorized to issue 50,000,000 shares of preferred stock.

Series A Preferred Stock

At December 31, 2022 and 2021, the Company had seven shares of Series A preferred stock issued and outstanding. Each share of Series A preferred stock has the right to convert into 214,289 shares of the Company's common stock. In the event of a liquidation, Series A have preference.

Series B Preferred Stock

On February 10, 2014, the Board of Directors of the Company under the authority granted under Article V of the Articles of Incorporation, defined and created a new preferred series of shares from the 50,000,000 authorized preferred shares. Pursuant to Article V, the Board of Directors has the power to designate such shares and all powers and matters concerning such shares. Such share class shall be designated Preferred Class B. The preferred class was created for 60 Preferred Class B shares. Such shares each have a voting power equal to one percent of the outstanding shares issued (totaling 60%) at the time of any vote action as necessary for share votes under Florida law, with or without a shareholder meeting. Such shares are non-convertible to common stock of the Company and are not considered as convertible under any accounting measure. Such shares shall only be held by the Board of Directors as a Corporate body, and shall not be placed into any individual name. Such shares were considered issued at the time of this resolution's adoption, and do not require a stock certificate to exist, unless selected to do so by the Board for representational purposes only. Such shares are considered for voting as a whole amount, and shall be voted for any matter by a majority vote of the Board of Directors. Such shares shall not be divisible among the Board members, and shall be voted as a whole either for or against such a vote upon the vote of the majority of the Board of Directors. In the event that there is any vote taken which results in a tie of a vote of the Board of Directors, the vote of the Chairman of the Board shall control the voting of such shares. Such shares are not transferable except in the case of a change of control of the Corporation when such shares shall continue to be held by the Board of Directors. Such shares have the authority to vote for all matters that require a share vote under Florida law and the Articles of Incorporation.

Warrants and Options

The Company did not issue any warrants or options during the years ended December 31, 2022 and 2021.

At December 31, 2022, the Company had no warrants to purchase shares of its restricted common stock outstanding.

The following table shows the warrants outstanding at December 31, 2022 and 2021:

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)	Average Intrinsic Value
Outstanding, December 31, 2020	4,000,000	\$ 0.0050	1.92	\$ 0.0013
Exercisable, December 31, 2020	4,000,000	\$ 0.0050	1.92	\$ 0.0013
Granted	-	-	-	-

Outstanding, December 31, 2021	4,000,000	\$ 0.0050	0.92	\$ 0.0010
Exercisable, December 31, 2021	4,000,000	\$ 0.0050	0.92	\$ 0.0010
Granted	-	-	-	-
Forfeited or expired	4,000,000	0.0050	-	-
Exercised	-	-	-	-
Outstanding, December 31, 2022	-	\$ -	-	\$ -

NOTE 8 – INCOME TAXES

At December 31, 2022 and 2021, the Company had available federal and state net operating loss carry forwards (“NOLs”) to reduce future taxable income. The amounts available were approximately \$25,200,000 and \$22,600,000 respectively, for federal purposes. The potential tax benefit arising from the NOLs of approximately \$14,600,000 from the period prior to the Act’s effective date will begin to expire in 2033. The potential tax benefit arising from the net operating loss carryforward of approximately \$10,600,000 generated from the period following the Act’s effective date can be carried forward indefinitely within the annual usage limitations. Given the Company’s history of net operating losses, management has determined that it is more likely than not that the Company will not be able to realize the tax benefit of the carryforwards. Accordingly, the Company has not recognized a deferred tax asset for this benefit.

The Company adopted FASB guidelines that address the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under this guidance, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. This guidance also provides guidance on derecognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. As of December 31, 2022 and 2021, the Company did not have a liability for unrecognized tax benefits.

The valuation allowance at December 31, 2022 was \$10,600,000. The net change in valuation allowance during the year ended December 31, 2022 was \$2,067,115. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred income tax assets will not be realized.

The Company’s policy is to record interest and penalties on uncertain tax provisions as income tax expense. As of December 31, 2022 and 2021, the Company has not accrued interest or penalties related to uncertain tax positions. Additionally, past tax years remain open to examination by the major taxing jurisdictions to which the Company is subject. The Company is preparing and reviewing information for tax returns for past years. Due to the Company’s lack of revenue since inception management does not believe that there is any income tax liability for past years. There are currently no open federal or state tax years under audit.

Upon the attainment of taxable income by the Company, management will assess the likelihood of realizing the tax benefit associated with the use of the carry forwards and will recognize a deferred tax asset at that time.

The items accounting for the difference between income taxes computed at the federal statutory rate and the provision for income taxes are as follows:

	For the Year Ended December 31, 2022	For the Year Ended December 31, 2021
Income tax at federal statutory rate	(21.00)%	(21.00)%
State tax, net of federal effect	(3.96)%	(3.96)%
	(24.96)%	(24.96)%
Valuation allowance	24.96%	24.96%
Effective rate	0.00%	0.00%

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

As of December 31, 2022 and 2021, the Company's only significant deferred income tax asset was a cumulative estimated net tax operating loss of approximately \$25,200,000 and \$22,600,000, respectively, that is available to offset future taxable income, if any, in future periods, subject to expiration and other limitations imposed by the Internal Revenue Service. Management has considered the Company's operating losses incurred to date and believes that a full valuation allowance against the deferred tax assets is required as of December 31, 2022 and 2021.

NOTE 9 – COMMITMENTS AND CONTINGENCIES

Agreement to Explore a Shipwreck Site Located off of Melbourne Beach, Florida

In March of 2014, Seafarer entered into a partnership with MAP, with the formation of Seafarer's Quest, LLC for the purpose of exploring a shipwreck site off of Melbourne Beach, Florida. Seafarer owns 50% of Seafarer's Quest, LLC and is handling the operations on behalf of Seafarer's Quest. To date there has been no significant financial activity in Seafarer's Quest. Under the partnership with MAP, Seafarer is the designated manager of Seafarer's Quest, LLC and is responsible for the costs of permitting, exploration and recovery. Seafarer is entitled to receive 80% and MAP is entitled to receive 20% of artifacts and treasure recovered from the site after the State of Florida receives its share, which is anticipated to be 20% under any future recovery permits. The permits with the State of Florida for two areas on the site, designated as Areas 1 and 2, were extended in early 2022 for an indefinite time period pending formal renewal. There are currently no recovery permits for the site that have been applied for or issued as of the date of this filing. It will be necessary to be granted a recovery permit in order to recover any artifacts and treasure that may potentially be located on the site. The required, affiliated environmental permits from the U.S. Army Corps of Engineers ("USACE") and Florida Department of Environmental Protection ("FLDEP") were previously issued in the name of a partner that is no longer active. In 2020 Seafarer worked with the various State of Florida governmental agencies involved to update and consolidate all of these environmental permits solely under the Company's name. The State of Florida Bureau of Archeological Research ("FBAR") had ordered the Company not to disturb the ocean's bottom while the changes and updates to the Company's permits were in process. Some requests of change are questionable to the Company. Since the issuance of the USACE and FLDEP environmental permits, FBAR has continued to stop or delay ground disturbance in Seafarer's legally permitted area with ongoing questions and requests.

Certain Other Agreements

See Note 4 Operating Lease Right-of-Use Assets and Operating Lease Liabilities.

NOTE 10 – RELATED PARTY TRANSACTIONS

During the year ended December 31, 2022, the Company has had extensive dealings with related parties including the following:

In May of 2022, the Company's CEO provided a loan to the Company in the amount of \$3,000. This loan pays interest at a rate of 1% per annum and the principal and accrued interest was due on or before June 17, 2022.

In July of 2022, the Company entered into a convertible promissory note agreement in the amount of \$20,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest was due on or before January 6, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.015 per share.

In July of 2022, the Company entered into a convertible promissory note agreement in the amount of \$10,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest was due on or before January 28, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.002 per share.

In August of 2022, the Company entered into a convertible promissory note agreement in the amount of \$10,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 6% per annum and the principal and accrued interest was due on or before February 4, 2023. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.002 per share.

In August of 2022, the Company's CEO provided a loan to the Company in the amount of \$3,500. This loan pays interest at a rate of 1% per annum and the principal and accrued interest was due on or before September 9, 2022.

In August of 2022, the Company entered into a promissory note agreement in the amount of \$5,000 with a related party. This note paid interest at a rate of 6% per annum and the principal and accrued interest was due on or before August 26, 2022. The lender received 500,000 shares of the Company's restricted common stock as a loan origination fee. The note was repaid and the balance at December 31, 2022 was \$0.

During the year ended December 31, 2021, the Company has had extensive dealings with related parties including the following:

In April of 2021, Seafarer's CEO provided a loan to the Company in the amount of \$6,000. The loan pays a 1% annual rate of interest, is due and payable on October 26, 2021 and is not secured.

In October of 2021, the Company entered into a convertible promissory note agreement in the amount of \$3,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 2% per annum and the principal and accrued interest is due on or before April 13, 2022. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.0020 per share.

In October of 2021, Seafarer's CEO provided a loan to the Company in the amount of \$1,400. The loan pays a 1% annual rate of interest, was due and payable on January 25, 2022 and is not secured.

In October of 2021, Seafarer's CEO provided a loan to the Company in the amount of \$1,000. The loan pays a 1% annual rate of interest, was due and payable on January 26, 2022 and is not secured.

In November of 2021, the Company entered into a convertible promissory note agreement in the amount of \$3,000 with a related party who is a member of the Board of Directors. This note pays interest at a rate of 2% per annum and the principal and accrued interest is due on or before May 10, 2022. The note is unsecured and is convertible at the lender's option into shares of the Company's common stock at a rate of \$0.0020 per share.

In December of 2021, the Company extended the term of previous agreements with four individuals to continue serving as members of the Company's Board of Directors. Two of the individuals are related to the Company's CEO. Under the agreement, the Directors agreed to provide various services to the Company including making recommendations for both the short term and the long term business strategies to be employed by the Company, monitoring and assessing the Company's business and to advise the Company's Board of Directors with respect to an appropriate business strategy on an ongoing basis, commenting on proposed corporate decisions and identifying and evaluating alternative courses of action, making suggestions to strengthen the Company's operations, identifying and evaluating external threats and opportunities to the Company, evaluating and making ongoing recommendations to the Board with respect for one year and may be terminated by either the Company or the Director by providing written notice to the other party. The previous agreement also terminates automatically upon the death, resignation or removal of the Directors. Under the terms of the agreement, the Company agreed to compensate the Board members via payment of 10,000,000 restricted shares of its common stock each, an aggregate total of 40,000,000 shares, and to negotiate future compensation on a year-by-year basis. The Company also agreed to reimburse the individuals for preapproved expenses.

Additional related party transactions:

The Company has an informal consulting agreement with a limited liability company that is owned and controlled by a person who is related to the Company's CEO to pay the related party limited liability company a variable amount per month plus periodic bonuses to provide general business consulting and assessing the Company's business and to advise management with respect to an appropriate business strategy on an ongoing basis, commenting on proposed corporate decisions, perform period background research including background checks and provide investigative information on individuals and companies and to assist, when needed, as an administrative specialist to perform various administrative duties and clerical services including reviewing the Company's agreements and books and records. The consultant provides the services under the direction and supervision of the Company's CEO. During the years ended December 31, 2022 and 2021, the Company paid the related party consultant fees of \$32,000 and \$15,000, respectively, for services rendered. These fees are recorded as an expense in consulting and contractor expenses in the accompanying consolidated statements of operations. At December 31, 2022 and 2021, the Company owed the related party limited liability company \$3,000 and \$0, respectively.

The Company has an ongoing agreement with a limited liability company that is owned and controlled by a person who is related to the Company's CEO to provide stock transfer agency services. During the years ended December 31, 2022 and 2021 the Company paid the related party limited liability company fees of \$6,478 and \$12,025 respectively, for services rendered. These fees are recorded as an expense in consulting and contractor expenses in the accompanying consolidated statements of operations. During the years ended December 31, 2022 and 2021, the Company also paid the related party limited liability 1,000,000 shares of the Company's restricted common stock, valued at \$5,100, as a bonus. All of the fees paid to the related party limited liability company are recorded as an expense in consulting and contractor expenses in the accompanying consolidated statements of operations. At December 31, 2022 and 2021, the Company owed the related party limited liability company \$3,975 and \$0, respectively.

During the years ended December 31, 2022 and 2021, the Company paid a person who is related to the Company's CEO consulting fees of \$36,500 and \$38,000, respectively, for assistance with social media and administrative services. Additionally, during the years ended December 31, 2022 and 2021, the Company paid the related party consultant 5,000,000 shares, valued at \$12,575 and 6,000,000 shares, valued at \$30,600, respectively, of the Company's restricted common stock as further compensation to offset cash payments for extra work and as a bonus. At December 31, 2022 and 2021, the Company owed the related party limited liability company \$3,000 and \$0, respectively.

During the years ended December 31, 2022 and 2021, the Company paid a person who is related to the Company's CEO fees of \$1,192 and \$0, respectively, for clerical services.

During the year ended December 31, 2021, the Company issued 8,734,640 shares of restricted common stock to a related party to settle \$20,302 of accrued interest owed on sixteen convertible notes payable.

During the years ended December 31, 2022 and 2021 the Company paid a related party individual fees of \$0 and \$8,500 respectively, for graphic design services. \$5,500 of the fees are recorded as an expense in consulting and contractor expenses in the accompanying consolidated statements of operations and \$3,000 of the fees were recorded as a prepaid expense on the accompanying consolidated balance sheets as of December 31, 2021.

During the years ended December 31, 2022 and 2021 the Company paid fees of \$93,500 and \$31,943 to one of its Board members for business consulting and strategic advisory services that were separate from his duties as a member of the Company's Board of Directors. At December 31, 2022 and 2021, the Company owed the related party \$0.

During the years ended December 31, 2022 and 2021 the Company paid fees of \$24,000 and \$22,000 to a limited liability company controlled by one of its Board members for business consulting and strategic advisory services that were separate from his duties as a member of the Company's Board of Directors. At December 31, 2022 and 2021, the Company owed the related party \$0.

Shareholder Loan Repayment

During the year ended December 31, 2022 the Company repaid its CEO \$3,017 of the principal balance and accrued interest for a loan dated May 17, 2022 that had an original principal balance of \$3,000 and \$4,078 of the principal balance plus accrued interest for a loan dated April 26, 2021 that had an original principal balance of \$6,000.

During the year ended December 31, 2021 the Company repaid its CEO \$2,000 for a loan dated April 26, 2021 that had an original principal balance of \$6,000.

At December 31, 2022 and 2021, the following promissory notes and shareholder loans were outstanding to related parties:

See Note 5 convertible notes payable – related parties, convertible notes payable – related parties, in default, and notes payable - related parties, in default.

NOTE 11 – SEGMENT INFORMATION

Seafarer’s wholly owned subsidiary Blockchain began operations in 2019 by providing referrals in exchange for referral fees for closed business.

Due to Blockchain starting operations which have no relation to the Company’s shipwreck and exploration recovery business, the Company evaluated this business and its impact upon the existing corporate structure. The Company has determined that Blockchain and Seafarer Exploration Corp. operate as separate segments of the business. As such, the Company has presented the income (loss) from operations during the years ended December 31, 2022 and 2021 incurred by the two separate segments below.

During the years ended December 31, 2022 and 2021, Blockchain revenues were \$0 and were 0% of the consolidated revenues of the Company.

Segment information relating to the Company’s two operating segments for the year ended December 31, 2022 is as follows:

	December 31, 2022	December 31, 2022	December 31, 2022
	Blockchain LogisTech, LLC	Seafarer Exploration Corp.	Consolidated
Service revenues	\$ -	\$ 12,972	\$ 12,972
Total operating expenses	30	2,438,325	2,438,355
Net loss from operations	\$ (30)	\$ (2,425,353)	\$ (2,425,383)

Segment information relating to the Company’s two operating segments for the year ended December 31, 2021 is as follows:

	December 31, 2021	December 31, 2021	December 31, 2021
	Blockchain LogisTech, LLC	Seafarer Exploration Corp.	Consolidated
Service revenues	\$ -	\$ 23,761	\$ 23,761
Total operating expenses	45,143	2,324,238	2,369,381
Net loss from operations	\$ (45,143)	\$ (2,300,477)	\$ (2,345,620)

NOTE 12 – SUBSEQUENT EVENTS

Subsequent to December 31, 2022:

In January of 2023, the Company entered into a rental and purchase agreement for a vessel and trailer. Under the terms of the agreement, the Company has the right to exclusive use of the vessel, a thirty four foot King Cat manufactured by Baha Cruisers, and trailer to be able to haul the vessel. The Company agreed to make a one time payment of 15,000,000 shares of its restricted common stock, with an agreed upon value of \$30,000 for the purposes of the valuation of the vessel and trailer, and pay \$1,557 per month for sixty months. The Company and the owner of the vessel and trailer agreed that the price of the shares for the purposes of the share price calculation was \$0.002. Once the Company has paid the amount totaling the agreed upon purchase price of \$100,000, the owner of the vessel agreed to transfer the title and ownership of the vessel and trailer to the Company.

In January of 2023, the Company entered into a rental and purchase agreement for a vehicle for use in the Company’s operations to tow vessels and other equipment. Under the terms of the agreement, the Company has the right to exclusive use of the vehicle, a 2021 Dodge RAM 3500. The Company agreed to make a one time payment of 11,242,350 shares of its restricted common stock, with an agreed upon value of \$22,485 for the purposes of the valuation of the truck, and pay \$1,167 per month for sixty two months. Once the Company has an amount totaling the payoff amount, \$52,464, to the seller, the seller agreed to transfer title and ownership of the vehicle to the Company.

Subsequent to December 31, 2022 the Company sold or issued additional shares of its restricted common stock as follows:

- (i) sales of 189,109,346 shares of restricted common stock under subscription agreements for proceeds received of approximately \$526,000;
- (ii) the issuance of 41,750,000 share of restricted common stock for subscription agreements that were entered into during the prior period for proceeds received of approximately \$83,500;
- (iii) the issuance of 68,959,066 shares of restricted common stock, with an aggregate value of approximately \$509,000 to various service providers; and
- (iv) the issuance of 1,000,000 shares of restricted common stock, with a value of approximately \$7,200, to a non profit as a charitable donation.

Subsequent to December 31, 2022 the following loans went into default:

- 1) A convertible note payable originally due January 6, 2023 with a face amount of \$20,000;
- 2) A convertible note payable originally due January 28, 2023 with a face amount of \$10,000; and
- 3) A convertible note payable originally due February 04, 2023 with a face amount of \$10,000.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures.

None

Item 9A. Controls and Procedures.

(a) Management’s Annual Report on Internal Control over Financial Reporting.

Management’s Responsibility for Controls and Procedures

The Company’s management is responsible for establishing and maintaining adequate internal control over the Company’s financial reporting. The Company’s controls over financial reporting are designed under the supervision of the Company’s Principal Executive Officer and Principal Financial Officer to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is accumulated and communicated to the Company’s management, including the Company’s principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our principal executive officer, the Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act, as of December 31, 2022. Based on this evaluation, management concluded that our financial disclosure controls and procedures were not effective so as to timely record, process, summarize and report financial information required to be included on our Securities and Exchange Commission (“SEC”) reports due to the Company’s limited internal resources and lack of ability to have multiple levels of transaction review. However, as a result of our evaluation and review process, management believes that the financial statements and other information presented herewith are materially correct.

Internal Control Over Financial Reporting

As of December 31, 2022, under the supervision and with the participation of our management, we conducted an evaluation of the effectiveness of the design and operations of our internal control over financial reporting, as defined in Rules 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 and based on the criteria for effective internal control described in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (as revised). Based on our evaluation, management concluded that our internal control over financial reporting was not effective so as to timely record, process, summarize and report financial information required to be included on our SEC reports due to the Company’s limited internal resources and lack of ability to have multiple levels of transaction review. However, as a result of our evaluation and review process, management believes that the financial statements and other information presented herewith are materially correct.

Management including its Principal Executive Officer/Principal Financial Officer, does not expect that its disclosure controls and procedures, or its internal controls over financial reporting will prevent all error and all fraud. A control system no matter how well conceived and operated, can provide only reasonable not absolute assurance that the objectives of the control system are met. Further, the design of the control system must reflect the fact that there are resource constraints, and the benefit of controls must be considered relative to their costs.

Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

The Company has limited resources and as a result, a material weakness in financial reporting currently exists, because of our limited resources and personnel, including those described below.

- * The Company has an insufficient quantity of dedicated resources and experienced personnel involved in reviewing and designing internal controls. As a result, a material misstatement of the interim and annual financial statements could occur and not be prevented or detected on a timely basis.
- * We have not achieved the optimal level of segregation of duties relative to key financial reporting functions.
- * We do not have an audit committee or an independent audit committee financial expert. While not being legally obligated to have an audit committee or independent audit committee financial expert, it is Management’s view that to have an audit committee, comprised of independent board members, and an independent audit committee financial expert, is an important entity-level control over the Company’s financial statements.

A material weakness is a deficiency (within the meaning of the Public Company Accounting Oversight Board (PCAOB) auditing standard 5) or combination of deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected on a timely basis. Management has determined that a material weakness exists due to a lack of segregation of duties, resulting from the Company’s limited resources and personnel.

Remediation Efforts to Address Deficiencies in Internal Control Over Financial Reporting

As a result of these findings, management, upon obtaining sufficient capital and operations, intends to take practical, cost-effective steps in implementing internal controls, including the possible remedial measures set forth below. As of December 31, 2022, we did not have sufficient capital and/or operations to implement any of the remedial measures described below.

- * Assessing the current duties of existing personnel and consultants, assigning additional duties to existing personnel and consultants, and, in a cost effective manner, potentially hiring additional personnel to assist with the preparation of the Company's financial statements to allow for proper segregation of duties, as well as additional resources for control documentation.
- * Assessing the duties of the existing officers of the Company and, in a cost effective manner, possibly promote or hire additional personnel to diversify duties and responsibilities of such executive officers.
- * Board to review and make recommendations to shareholders concerning the composition of the Board of Directors, with particular focus on issues of independence. The Board of Directors will consider nominating an audit committee and audit committee financial expert, which may or may not consist of independent members.
- * Interviewing and potentially hiring outside consultants that are experts in designing internal controls over financial reporting based on criteria established in Internal Control Integrated Framework issued by Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") (as revised).

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the SEC that permit us to provide only management's report in this annual report.

(b) Change in Internal Control Over Financial Reporting

The Company has not made any change in our internal control over financial reporting during the year ended December 31, 2022.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Name	Age	Position
Kyle Kennedy	63	President, CEO, Chairman of the Board
Charles Branscum	62	Director
Robert L. Kennedy	71	Director
Bradford Clark	53	Director
Thomas Soeder	76	Director

Kyle Kennedy

President, Chief Executive Officer, Chairman of the Board

In 2001, Mr. Kennedy co-founded a securities brokerage firm that offered securities sales and trading as well as investment banking services. In 2003, Mr. Kennedy was also one of the founders of a securities transfer and processing company. Prior experience includes: August 1995 to Present – President of Kennedy and Associates, Business Consultants; March 1998 to December 1998 – Vice President Corporate Finance, Palm State Equities, Inc.; January 1999 to September 1999 – Vice President Investment Banking, 1st American Investment Banking; September 1999 to May 2000 – President and CEO, Nowtrade Corp. Mr. Kennedy is a senior financial executive, CEO, and President, with over 28 years of experience in the brokerage business. He has held the following licenses: Series 3, 4, 5, 7, 52, 63, 24 and 55. He created, built and co-managed over \$400 million of assets in money management, with specific focus in equity analysis. Mr. Kennedy's public company experience includes his position as Executive Vice President and ultimately, acting President, of a public holding company with four diverse operating entities. He performed the day to day operations of the company and management. He was directly responsible for the turnaround of this complex, diverse holding company and successfully developed and implemented a creditor workout plan, negotiating with over 100 creditors, collection agencies and attorneys.

Charles Branscum

Director

Mr. Branscum has spent the majority of his professional career working for Arkansas Steel Associates, LLC ("ASA"). Mr. Branscum is currently the rolling mill foreman for ASA.

Robert L. Kennedy

Director

Dr. Robert L. "Rob" Kennedy began his professional career as a mathematics teacher with Horace Mann Junior High School in Little Rock, Arkansas. Returning to graduate school, he taught calculus in the mathematics department as a teaching assistant (TA) at the University of Nebraska in Lincoln (UNL). Following his work at UNL, he taught mathematics at Kirkwood Community College in Cedar Rapids, Iowa. Upon entering a doctoral program at the University of Missouri, Columbia, he taught undergraduate and graduate courses in mathematics and statistics as a TA. His Ph.D. was awarded in Higher Education with majors in Educational Psychology and Mathematical Statistics. After graduation, Dr. Kennedy taught basic, advanced, and multivariate statistics in a doctoral education program at the University of Arkansas at Little Rock. With a move to the University of Arkansas for Medical Sciences (UAMS), he continued teaching comparable courses in the Ph.D. nursing program. After twelve years, Dr. Kennedy retired as a Professor in the Office of Educational Development of UAMS after serving for a time as Clinical Professor and Chair of the Department of Nursing Science, and Director of the Scholarship and Research Center, all with UAMS. He has worked in the areas of evaluation, research, statistics, and technology in several universities, including those mentioned above, as well as Western Kentucky University, the University of Central Arkansas, and as an adjunct with the University of Central Michigan and the University of Memphis. He has consulted with numerous school districts and businesses, done extensive research and documentation, and is a past president of both the MidSouth Educational Research Association and the Mid-South Educational Research Foundation.

Bradford Clark

Director

Mr. Clark is a six-year veteran of the Air National Guard where he achieved the rank senior airman. Mr. Clark has owned and operated several lawn maintenance companies over the past thirty-seven years. Mr. Clark works with businesses to help them to increase efficiency and facilitate changes designed to enhance their business model and encourage growth. Mr. Clark holds a Bachelor of Business Administration in Management, University of Arkansas Little Rock.

Thomas Soeder

Director

Tom Soeder has approximately forty-nine years of experience in computer sales, systems and management responsibilities across all market segments, most product groups, and the full range of sales channels. As an Avnet account manager, Mr. Soeder concentrated his efforts primarily on federal government business working with prime and subcontractors, winning over thirty new projects. With his teaming efforts on ECS3, Mr. Soeder brought to Avnet the first commodities based subcontract worth over \$600 billion in hardware dollars over ten years. Tom achieved Presidents Club two years running. Mr. Soeder also served Avnet as its Mid Atlantic business development manager. Additionally, Mr. Soeder also supported the team as a systems engineer covering Motorola and Intel designs.

Family Relationships

Charles Branscum and Robert L. Kennedy are both related to Seafarer's CEO, Kyle Kennedy.

Director Positions in Other Public Companies

No director holds any directorship in a company with a class of securities registered pursuant to Section 12 of the Securities Exchange Act of 1934 or subject to the requirements of Section 15(d) of such Act. No director holds any directorship in a company registered as an investment company under the Investment Company Act of 1940.

Code of Conduct

As the Board of Directors only has five directors, no audit or strategy committee has been established. The Company does not have a standing nominating committee or any committee performing a similar function. For the above reasons, the Company has not adopted a code of ethics although the Company intends to adopt a code of ethics.

Reliance on Certain Key Individuals

The Company believes that its future success will depend on the abilities and continued service of its CEO, Kyle Kennedy, and some of its consultants and advisors. If Seafarer was not be able to retain Mr. Kennedy as the Company's CEO, then the Board of Directors believes the Company would very likely suffer serious adverse and material consequences. Seafarer also utilizes the services of several key consultants and advisors who have been very instrumental in the growth and development of the Company, particularly in the areas of archeological research and diving operations, corporate financial consulting, strategic planning and corporate advisory services. The Company believes that it is very important to its long-term success to retain the services of these consultants and advisors.

Item 11. Executive Compensation.

Officers Summary Compensation Table

Name and Principal Position	Period End	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Non-qualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Kyle Kennedy (1)	12/31/22	\$ 180,010	--	--	--	--	--	\$ 2,794	\$ 182,804
	12/31/21	\$ 281,973	--	--	--	--	--	\$ 1,034	\$ 283,007

- (1) Mr. Kennedy did not receive any stock based compensation during the years ended December 31, 2022 and 2021. As of January 1, 2020 the Company's Board of Directors agreed that the Company will provide a salary and other compensation to Mr. Kennedy after he did not receive a salary or any stock based compensation in years prior to 2020. During the years ended December 31, 2022 and 2021 the Company paid \$2,794 and \$1,034 respectively for health, dental and other benefits for Mr. Kennedy. As a part of his duties as CEO, Mr. Kennedy is required to travel extensively on Company business as the Company's diving operations are located on the East Coast of Florida and the Company's headquarters are located on the West Coast of Florida. The Company determined that it would be less expensive for Mr. Kennedy to use his personal vehicle to travel on Company business rather than to lease a car for him. In lieu of leasing a car for Mr. Kennedy to use for Company business, Mr. Kennedy uses his personal vehicle for Company related travel. The Company provides Mr. Kennedy with periodic expense advances and reimbursements, including travel reimbursements for mileage and fuel for the use of his vehicle for Company business and reimburses him for various other Company business related expenses. The Company reimbursed or advanced to Mr. Kennedy \$14,324 in 2022 and \$10,301 in 2021 for travel related expenses and other Company expenses. The Company also paid \$4,850 in 2022 and \$4,183 in 2021 for Mr. Kennedy's cellular telephone, text, and wireless data plan.

Officer Compensation

The Company does not have a formal compensation plan in place for its officer. The Company's Board of Directors authorized Mr. Kennedy to receive a salary, at his discretion based on the Company's financial position and developments with the business, in 2020 after not paying him a salary since the inception of the Company in 2008. As of the date of the filing of this report the Board of Directors and Mr. Kennedy have been engaged in the process of negotiating a compensation plan that includes stock based payments and other bonuses and incentives with Mr. Kennedy in order to retain his services as the Company's CEO.

Directors Summary Compensation Table

The following table shows the fees paid to the Company's Board of Directors for the years ending December 31, 2022 and 2021 for their work as members of the Board of Directors:

Name and Principal Position	Period End	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Non-qualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Kyle Kennedy ⁽¹⁾	12/31/2022	--	--	--	--	--	--	--	--
	12/31/2021	--	--	--	--	--	--	--	--

	12/31/2021	--	--	\$ 40,000	--	--	--	--	\$ 40,000

- (1) During the years ended December 31, 2022 and 2021 the Company did not pay any Director's fees to its Chairman of the Board, Kyle Kennedy. The salaries paid to Mr. Kennedy for his services as the Company's CEO during the years ended December 31, 2022 and 2021 are listed under Item 11 – Executive Compensation and are not listed in the Directors' compensation table.
- (2) During the years ended December 31, 2022 and 2021 the Company did not pay any fees to Mr. Branscum other than those listed in the Directors' compensation table.
- (3) During the years ended December 31, 2022 and 2021 the Company did not pay any fees to Dr. Kennedy other than those listed in the Directors' compensation table.
- (4) During the years ended December 31, 2022 and 2021 the Company paid fees of \$93,500 and \$31,943 to Mr. Clark for business consulting and operations management services that were separate from his duties as a member of the Company's Board of Directors, these fees are not listed in the Directors' compensation table.
- (5) During the years ended December 31, 2022 and 2021 the Company paid fees of \$24,000 and \$22,000 to a limited liability company controlled by Mr. Soeder for business consulting and strategic advisory services that were separate from his duties as a member of the Company's Board of Directors, these fees are not listed in the Directors' compensation table.

Director Compensation

The Company does not have a formal compensation plan in place for its directors.

Employment Agreements

None.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following tables set forth certain information regarding beneficial ownership of our capital stock as of the date hereof by (i) each person whom we know to beneficially own more than five percent (5%) of any class of our common stock, (ii) each of our directors, (iii) each of the executive officers and (iv) all our directors and executive officers as a group. Unless otherwise indicated, each of the persons listed below has sole voting and investment power with respect to the shares beneficially owned.

Our total authorized capital stock consists of 9,900,000,000 shares of common stock, \$0.0001 par value per share. As of December 31, 2022, there were 7,172,668,896 shares of our common stock outstanding.

This table reflects shares that were issued and outstanding as of December 31, 2022.

Name and Address of Beneficial Owners ¹	Shares of common stock beneficially owned	Percentage of common shares beneficially owned ²
Kyle Kennedy - President, CEO and Chairman of the Board ³	35,500,000	*
Charles Branscum – Director	119,000,000	1.66%
Dr. Robert L. Kennedy – Director	154,690,267	2.16%
Bradford Clark – Director	48,443,555	*
Thomas Soeder – Director	76,784,787	1.07%
Maximilian Thyssen - Shareholder	548,127,580	7.64%
All Directors and Officers and 5% or greater holders as group (6 persons)	928,546,189	13.70%

* Less than 1%

(1) Unless otherwise indicated, the address of each person listed below is c/o Seafarer Exploration Corp, 14497 North Dale Mabry Highway, Suite 209-N, Tampa, Florida 3618.

(2) Percentages are based on 7,172,668,896 shares of common stock issued and outstanding at December 31, 2022.

(3) For the purposes of this table, the share amounts being shown as beneficially owned by Mr. Kennedy include: 35,500,000 shares legally owned by Credo Argentarius, LLC (“Credo”), an entity controlled by Mr. Kennedy’s spouse. This statement shall not be construed as an admission that Mr. Kennedy is, for the purposes of Section 13(d) or Section 16 of the Securities Exchange Act of 1934, the beneficial owner of any of the securities set forth in the preceding sentence.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

See Note 9 – Related Party Transactions.

Item 14. Principal Accounting Fees and Services

Audit Related Fees

For the years ended December 31, 2022 and 2021, the Company paid \$30,000 and \$32,500 respectively, in fees related to services rendered by our principal accountant for professional services rendered for the audit and review of our consolidated financial statements.

Tax Fees

For the years ended December 31, 2022 and 2021, the Company paid \$0 in fees for professional services rendered fees related to services rendered by our principal accountant for tax compliance, tax advice, and tax planning.

All Other Fees

The Company did not incur any other fees related to services rendered by our principal accountant for the years ended December 31, 2022 and 2021.

**CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER AND PRINCIPAL ACCOUNTING OFFICER
PURSUANT TO THE SECURITIES EXCHANGE ACT OF 1934,
RULES 13a-14 AND 15d-14
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Kyle Kennedy, Chief Executive Officer and President of the registrant, certify that:

1. I have reviewed this Annual Report on Form 10-K of Seafarer Exploration Corp.;
2. Based on my knowledge, this Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Report;
3. Based on my knowledge, the financial statements, and other financial information included in this Report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant, as of, and for, the periods presented in this Report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this Report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted account principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this Report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this Report based on such evaluation; and
 - (d) Disclosed in this Report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and to the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

Solely for the purposes of complying with 18 U.S.C. §1350, as adopted pursuant to §906 of the Sarbanes-Oxley Act of 2002:

I, Kyle Kennedy, the undersigned Chief Executive Officer of Seafarer Exploration Corp. (the “Company”), hereby certifies, based on my knowledge, that the Annual Report on Form 10-K of the Company for the year ended December 31, 2022, as filed with the Securities and Exchange Commission on the date hereof (the “Report”):

- (1) the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: March 31, 2023
